INTERNAL RISK FACTORS

1. ***Our revenues are highly dependent on a limited number of broadcasters, Film studios and streaming platforms. The loss of, or a significant reduction in orders from, any of our major customers could have a material adverse effect on our business, financial condition, results of operations and prospects.***

A significant portion of our revenue is derived from a limited number of customers, primarily major television broadcasters, film studios and Over-the-Top (OTT) platforms. For the fiscal years ended March 31, 2026 March 31, 2025 and 2024, our top 5 customers accounted for 85.05% ,78.91% and 99.93%of our total revenue, respectively. Our largest customer, Jiostar India Private Limited accounted for 36.21 % of our revenue in March 31, 2026.

Our arrangements with these broadcasters, film studios and platforms are typically on a project-by-project basis or for a fixed term, and there is no certainty of renewal or greenlighting of a new film production The television, film and digital content industry is characterized by evolving programming strategies audience preferences, which can lead to the cancellation of existing shows or a reduction in the volume of content commissioned from us or reduction of film projects being green-lit by the film studio

The loss of any of our key customers, a decision by them to reduce their content acquisition budgets, or a shift in their programming preferences could lead to a sharp decline in our revenues. We cannot assure you that we will be able to maintain our relationships with our existing customers or that we will be able to secure new customers to replace any lost revenue.

2. ***The success of our business is dependent on the commercial viability of our television shows, web-series and films, which is inherently unpredictable and subject to audience preferences.***

The entertainment industry is highly speculative, and the commercial success of our content is largely dependent on audience acceptance. Audience tastes are fickle and can change rapidly, making it difficult to predict the appeal of any given project. A significant portion of our revenue is often derived from a small number of successful shows. For example, our long-running and popular shows like ' 'Comedy Circus, Crime Patrol, Rising Star and Baalveer have been significant revenue drivers in the past but there is no guarantee that our future projects will achieve similar success. In fact, there are also other TV shows created by our Company that have not been renewed by channels.

3. ***The production of television, film and OTT/Digital content is a complex process, and we are subject to risks such as production delays and cost overruns.***

The production of high-quality content involves significant planning, coordination, and resources. Our production schedules are subject to various risks, including:

- Talent Availability: The unavailability of key actors, directors, or other creative talent due to scheduling conflicts or other reasons can lead to delays.
- Resource Constraints: Delays in securing suitable locations, equipment, or post-production facilities can impact our production timelines.
- Unforeseen Events: Events such as adverse weather conditions, accidents, or public health emergencies can disrupt production.

Any significant delay in the production process can lead to cost overruns, which may not be recoverable from our clients. Furthermore, a failure to deliver content within the agreed timelines could result in financial penalties, damage to our reputation, and a loss of future business opportunities.

4. ***Our strategy to shift from a commission model to owning and monetising intellectual property (IP) increases capital intensity and earnings volatility; success depends on the performance of the underlying content and monetisation windows.***

Owning IP requires upfront investment in development and production, followed by staggered monetisation (theatrical/OTT/satellite/digital/music/ancillary). Under performance can lead to impairment of content inventory and lower cash conversion. The timing and realisation of downstream rights are uncertain and depend on market demand, platform budgets, and regulatory landscape. Inventory carrying amount as on March 31, 2026 was ₹ 7,041.48 lacs, ₹ 5,167.78 as on March 31, 2025 and ₹ 4,101.32 as on March 31, 2024.

5. ***We derive a majority of our revenues from a limited number of customers, including broadcasters, film studios, OTT platforms and distributors.***

For the Fiscal 2026, our top five customers accounted for approximately 85.05% of our revenue. For Fiscal 2025 and Fiscal 2024, the top five customers contributed 78.91% and 99.93% of revenues respectively. The concentration of revenues increases our dependency on a few counterparties for a major portion of our business. Any reduction in orders, adverse change in terms, financial stress, or discontinuation of business by such customers could materially affect our financial results. Additionally, since our contracts are generally on a project-to-project basis, there is no certainty that these customers will continue to commission or acquire future projects from us.

Contribution of Top Customers:

(Amount in Lakhs)

Particulars	FY 2026	FY 2025	FY 2024
Revenue from Top 5 Customers (₹ lakhs)	11,480.77	9,815.11	5,472.61
% of Total Revenue	85.05%	78.91%	99.93%
Revenue from Top 10 Customers (₹ lakhs)	12,932.86	12,345.11	5,476.24
% of Total Revenue	95.81%	99.26%	100.00%

Loss of any key customer could have a material adverse effect on our business.

6. ***Our rapid growth and planned expansion into new content formats may strain our financial and operational resources and adversely affect our performance.***

Our revenue grew from ₹5,476.24 lakhs in Fiscal 2024 to ₹13,498.75 lakhs in Fiscal 2026, representing a CAGR of 57.00%. Our rapid growth and expansion into films, OTT and digital-first intellectual properties require significant working capital, financing and technological integration, and any failure to manage these effectively could adversely affect our business, financial condition and results of operations. To sustain growth, we are expanding into Films, OTT, and digital-first IPs. Execution requires increased working capital, additional financing, and integration of new technology platforms. If we are unable to manage resources effectively, our growth and profitability may be constrained.

7. ***We do not own our registered office premises and rely on leased/leave and license arrangements for certain facilities.***

As on the date of this Red Herring Prospectus, our registered is located in leased premises in Andheri West, Mumbai. The lease rentals for our office and creative premises aggregate approximately ₹10.57 lakhs per month. The lease terms typically range between 3–5 years and are renewable at the discretion of the lessor. Termination, non-renewal, or increase in rentals under these agreements could require us to relocate operations, leading to disruption of business activities and additional costs.

8. ***We do not own the intellectual property rights for our television and Over-the-Top (OTT) content as we operate on a 'cost-plus' model. This limits our ability to generate long-term revenue streams from our content library and makes us dependent on the continuous commissioning of new projects from broadcasters and platforms.***

Our primary business model for television and OTT content production is based on providing production services on a "cost-plus" or "fee-for-service" basis. Under this model, the broadcaster or OTT platform commissions us to produce content based on a concept, which may be developed by us or provided by them. The client funds the entire production cost and, in consideration, retains the intellectual property (IP) rights to the produced content, including the underlying concept, format, and all audio-visual elements.

While this model provides us with a stable revenue stream and mitigates the financial risks associated with content production, it has several significant long-term implications:

- **Lack of Asset Creation:** We do not build a library of valuable IP assets from our core business operations. Unlike production houses that own their content, we cannot benefit from the long-term value of our successful shows

through syndication, licensing to other platforms or territories, merchandising, or format rights sales. Our revenue is transactional and limited to the production fees earned for each project.

- **Dependence and Replaceability:** Since the client owns the IP, they have the contractual right to engage other production companies for subsequent seasons of a successful show that we may have originally produced. The success of a show does not guarantee that we will be commissioned for its future iterations. This makes us technically replaceable and highly dependent on maintaining strong, ongoing relationships with our clients to secure new and recurring business.
- **Limited Revenue Upside:** Our profitability on each project is limited to our agreed-upon production margin. We do not participate in the potential upside from a show becoming a major commercial success, as we do not have a share in the advertising or subscription revenue it generates for the broadcaster or platform.

As a result of this business model, our future revenues are not assured and are contingent on our ability to continuously pitch new concepts and be awarded new production contracts. A failure to consistently secure new projects could have a material adverse effect on our business, financial condition, and results of operations.

9. Our Company has negative cash flows from its operating, investing and financing activities in the past years, details of which are given below. Sustained negative cash flow could impact on our growth and business.

Our Company had negative cash flows from our operating activities and financing activities in FY 2024 and in FY2026 we had negative cashflows from operating activities, investing activities and financing activities as per the Restated Financial Statements and the same are summarized as under:

(Amount in ₹ Lakhs)

Particulars	For the year ended on March 31, 2026	For the year ended on March 31, 2025	For the year ended on March 31, 2024
Net Cash (used in)/ generated from Operating activities	(804.93)	87.20	(280.69)
Net Cash (used in)/ generated from Investing activities	(1,351.26)	0.76	7.91
Net Cash (used in)/ generated from Finance activities	1,021.52	1,986.40	(57.50)
Net Increase/(Decrease) in Cash and Cash Equivalents	**(1,134.67)**	**2,074.36**	**(330.27)**

Note: *For further details regarding this transaction, please refer to the page number 76 in the chapter titled Capital Structure of this Red Herring Prospectus.*

Cash flow of a company is a key indicator to show the extent of cash generated from operations to meet capital expenditure, pay dividends, repay loans and make new investments without raising finance from external resources. If we are not able to generate sufficient cash flows in future, it may adversely affect our business and financial operations. While we endeavor to strengthen our operations and financial management, it is important to note that there can be no assurance that our net cash flows will always remain positive in the future. Any negative cash flows in the future could adversely affect our results of operations and financial condition, and we cannot assure you that our net cash flows will be positive in the future. For further details, see ***"Summary of Financial Statements"*** and ***"Management's Discussion and Analysis of Results of Operations and Financial Condition Cash Flows"*** on Pages 54, and 228 respectively of this Red Herring Prospectus.

10. We are dependent on our Promoter, senior management, and availability of key creative talent.

Our Promoter's and senior management have longstanding relationships in the industry and play a critical role in securing projects and ensuring execution. The loss of their services could adversely impact our operations. Further, our success depends on the availability and performance of actors, directors, writers, and technicians, who are often engaged on a project basis. The entertainment industry is highly competitive in terms of attracting talent, and we may not always be able to secure talent at favorable terms. Inability to attract or retain such key personnel could delay production, increase costs, and impact the quality of our content.

As on March 31, 2026, we had 38 employees (Including Monthly consultants) and engaged on an average between 150 -170 professionals across film, web series or any TV project basis. Attrition or non-availability of such talent could cause production delays.

11. Our operations are subject to hazards inherent in film and TV production.

Film and television production involves working with large crews, elaborate sets, expensive equipment, and

occasionally hazardous shooting environments. Accidents, fires, or other incidents may lead to injury, property damage, or delays. Although we maintain production insurance, coverage may not extend to reputational loss or consequential delays.

Insurance Claims Related to Production

Insurance Claims Related to Production					
Fiscal Year	**No. of Claims Filed**	**Production Budget amount for insurance**	**Gross Assessed loss**	**Net claim amount Received**	**Pending Claims (Rs. lakhs)**

As on May 31, 2026	1	6,250	0.32	0.23	-

12. Our insurance coverage may not adequately protect us against all material risks.

We maintain insurance policies for production, cast, crew, office premises and certain equipment. However, exclusions, deductibles, delays in claims settlement, or disputes with insurers could prevent us from fully recovering losses. Risks such as reputational damage, creative disputes, and regulatory actions are typically not insurable.

As of date of this RHP , our insurance coverage includes:

Insurance Coverage

Category	Amount Covered (₹ lakhs)	Key Exclusions
Film Production Insurance	2,553.76	Delays, reputational risks
Group Health & Accident	10,350.00	Certain pre-existing conditions
Office & Equipment Insurance	947.57	Terrorism, certain natural calamities
E & O Policy	4,243.52	

Any losses exceeding these limits or excluded from coverage may need to be borne by us. For further details, see "Business – Insurance" on page 167.

13. We may have certain contingent liabilities, which if materialised, could adversely affect our business and results of operations.

As of March 31, 2026, our contingent liabilities stood at ₹22.73 lakhs, primarily relating to [tax/GST/service tax] demands under dispute. If resolved unfavorably, we may be required to make significant payments, which could impact cash flows and financial condition. Further, the existence of such liabilities may limit our ability to raise financing or enter into commercial arrangements. We may be required to make significant payments, which could impact cash flows and financial condition.

14. Piracy of our content may adversely impact our revenues

Piracy is an industry-wide challenge and continues to affect legitimate revenues of content producers. Films and web series are often leaked online through unauthorised streaming websites, illegal downloads or through physical duplication. Despite enforcement efforts, piracy remains difficult to control and leads to significant losses. the Company has not faced any material instances of delay in payment collections or defaults from clients in the past. The Company's revenue is primarily derived from reputed government, institutional, and corporate clients with established payment processes. While there have been minor operational delays within normal business parameters (generally within 30–45 days of the due date), these have been procedural in nature and not indicative of any credit or collection risk. All such payments have been duly realized without any write-offs or disputes.

To further strengthen internal controls, the Company has implemented a systematic receivable tracking mechanism and periodic reconciliation with client departments to ensure timely realization. These measures, along with improved invoicing systems and milestone-based billing under government contracts, have helped minimize collection timelines. Piracy not only erodes revenues from theatres and OTT platforms but also reduces the bargaining power of producers when negotiating for satellite or overseas rights. Moreover, pirated copies often circulate immediately after release, which undermines marketing efforts and reduces audience willingness to pay for original content. Continued and growing piracy of our films or shows could adversely affect our revenues, brand value and profitability.

15. We may be subject to intellectual property infringement claims.

Our business depends on the creation of original content. However, given the competitive nature of the industry and the overlap of themes and storylines, the risk of third-party claims alleging copyright or trademark infringement cannot be ruled out. Such claims may result in costly litigation, delays in release, or restrictions on distribution of affected content. Even unsubstantiated claims may consume management time, increase legal costs, and damage our reputation. Moreover, if any claim is upheld, we may be required to pay significant penalties or alter the content, adversely affecting profitability.

As on the date of this Red Herring Prospectus, there are no pending notices alleging infringement of third-party rights against our Company.

16. ***Delays, cost overruns, cancellations or abandonment of projects may adversely affect our business.***

Film and television production involves long cycles, high capital intensity, and dependence on several variables. Projects can be delayed or abandoned due to unavailability of actors, labour disputes, accidents, weather conditions, production disputes, or changes in regulatory policies. Such delays can lead to significant cost escalations which may not be recoverable. In addition, delays may result in missing favorable theatrical release windows, which are crucial for box office success.

17. We rely on key relationships and strategic partnerships; any deterioration, non-renewal or change in terms may adversely affect our pipeline and monetisation.

We rely on non-exclusive strategic collaborations with leading studios, broadcasters, OTT platforms, technology platforms and distribution partners for production finance, co-production, monetisation and marketing reach. Any reduction in commitments by such partners, adverse changes in commercial terms (including minimum guarantees or revenue-share), financial stress, integration-related pauses, or termination/non-renewal of arrangements may adversely affect our project pipeline, margins, cash flows and ability to monetise content on a timely basis.
The Indian Media and Entertainment industry has seen repeated, well-documented shocks that pause or reshape commissioning decisions, budgets and payment cycles at broadcasters and OTT platforms—directly affecting producers reliant on those partners, including:

- ***Channel/Platform shutdowns or pivots***: Sahara One and multiple niche/English entertainment channels wound down; HBO/AXN linear exits; Voot merged into JioCinema with commissioning pauses during integration.
- ***Aborted/Delayed corporate actions***: Zee: Sony merger being called off after a prolonged timeline; Disney Star's strategic transition culminating in Jio/Disney combination discussions and changes—periods around such events typically see slower approvals and revised terms.

- ***Launches announced then deferred/cancelled***: Several GEC/regionals announced but later shelved or re-scoped, freezing development slates and shifting slot strategies.
- ***Rights & capex reallocation shocks***: IPL/major sports rights cycles cause large cash redeployments at buyers, reducing near-term scripted commissioning.
- ***Policy/market disruptions***: TRAI tariff/NTO resets impacting ad yields; pandemic-era release halts; election-period advertising slowdowns; platform brand-safety/algorithm changes on digital affecting AVOD monetization trajectories.

These episodes typically translate into commissioning delays or cancellations,
tougher revenue-share or minimum guarantee terms, slower cash collections, and
re-prioritisation toward proven intellectual property or sports, any of which could adversely affect our business, financial condition, cash flows and results of operations.

18. Dependence on key creative and managerial talent; loss of, or reduced availability of, such personnel could adversely affect us.

Our success depends on the vision, execution capabilities and industry relationships of our Promoters and senior management, as well as showrunners, directors, writers, editors and on-screen talent associated with our projects. We are exposed to attrition risks and constraints arising from exclusivity obligations, availability conflicts, guild requirements and competitive bidding dynamics. Any inability to attract or retain such talent on commercially acceptable terms could result in production delays, increased costs and delivery risks.
Our reliance on key creative and managerial talent exposes us to real, documented shocks that affect availability, schedules and costs, including:

- ***Industry strikes & stoppages***: The Mumbai TV/film workers' strike (FWICE) in 2008 halted primetime shoots for ~two weeks; the 2020 nationwide lockdown paused nearly all production for multiple months; the 2023 WGA/SAG-AFTRA strikes created global availability constraints and post-production bottlenecks for streamer-commissioned content.
- ***Regional shutdowns***: The Tamil film industry strike in 2018 suspended releases/production for several weeks, impacting pan-India talent calendars and facility access.
- ***Exclusivity & bidding pressure from OTT growth***: Since 2018, platforms have offered exclusive multi-title deals to showrunners/lead writers/directors, pulling them off rival slates and elongating development cycles.
- ***Talent-linked delays and recasts***: High-visibility instances of injuries/health issues, #MeToo-related exits, and date clashes have forced rescheduling or recasting on industry projects, increasing above-the-line costs and P&A timing risk.

We have previously experienced attrition of marquee on-screen talent engaged under long-term arrangements—Kapil Sharma, Krushna Abhishek, and Bharti Singh—who subsequently anchored or launched shows on television broadcasters. Such departures can disrupt continuity, necessitate format re-engineering and re-casting on short notice, and may adversely impact ratings, advertiser confidence and advertising run-rates until replacement ensembles stabilize.

19. Regulatory and policy risks for media and digital businesses may increase compliance burden and affect monetisation.

Our films and content are subject to multiple regulatory and policy frameworks, and changes or enforcement actions under these regimes may increase compliance costs, delay releases and adversely affect monetisation. Film content requires certification from the Central Board of Film Certification ("CBFC") and may be subject to mandated cuts or restrictions. Historically, CBFC certification delays and required modifications have impacted several high-profile releases, including OMG 2, Padmaavat and Udta Punjab, resulting in deferred releases, re-editing costs and constraints on certification categories such as U/A or A. In the digital segment, online curated content is governed by evolving rules, advisories and platform-specific guidelines. OTT platforms have faced post-release takedown pressures and court directions under the Information Technology (Intermediary Guidelines and Digital Media Ethics Code), 2021, necessitating additional compliance, grievance redressal and content moderation layers.

Advertising and broadcast regulations have also undergone material shifts. The implementation of TRAI's Tariff Orders and subsequent amendments altered advertising inventory utilisation, channel packaging and distribution margins, which compressed short-term broadcaster revenues and affected commissioning appetite and monetisation terms for content producers. Taxation and payment-related regulations, including withholding tax on royalties, GST on digital services, and evolving norms governing cross-border payments and foreign investment in digital media, have increased documentation, compliance and cash-flow friction. Further, data and content-related regulations such as the Digital Personal Data Protection Act, 2023, along with proposed guidelines relating to children's content and user-generated content moderation, impose continuing obligations on digital publishers and producers.

Additionally, evolving policy oversight concerning telecom service provider and OTT convergence, content classification standards and proposed certification or self-regulatory mechanisms for OTT content may extend approval timelines or increase compliance costs. These regulatory and policy developments underscore that the operating environment for media and digital businesses remains dynamic, and changes in certification, advertising, taxation, data protection or platform regulation may adversely impact our content timelines, cost structures and monetisation flexibility.

20. Our digital initiatives (including AI-enabled content creation, short-form apps/platforms and YouTube-first IP) expose us to product, technology, data protection and platform-policy risks.

Developing and operating consumer-facing digital products, including AI-enabled content pipelines, short-form applications and YouTube-first intellectual property, exposes us to technology, regulatory and platform-related risks that can directly affect uptime, user growth and monetisation. Such operations are susceptible to product and technology outages arising from traffic spikes, content delivery network failures or cyber incidents, which may disrupt content releases, ad delivery and user access. Security lapses or cyber breaches may result in data protection liabilities under applicable privacy laws and app-store rules. Compliance with data protection frameworks, including India's Digital Personal Data Protection Act, 2023, overseas data protection regimes, children's content restrictions and user-generated content moderation obligations, increases requirements relating to consent management, age-gating, data storage and cross-border data transfers. The use of AI-enabled content creation also exposes us to potential claims relating to copyright, personality and publicity rights, defamation and the provenance of training data, while emerging platform rules increasingly require disclosure or watermarking of synthetic or altered media. Our digital initiatives are also exposed to platform-policy and algorithm volatility, as evidenced by historical changes such as YouTube's brand-safety "adpocalypse," monetisation changes for made-for-kids content, updates to Shorts revenue-sharing rules, and evolving content-classification policies that have materially altered reach and revenue per mille for creators. Distribution risks are further illustrated by events such as the ban of TikTok in India, as well as app-store policy changes, fee structures and local payments regulations, including RBI e-mandate and KYC requirements, which have affected subscription flows and in-app commerce. Collectively, these factors demonstrate that policy and technology changes outside our control may compress yields, delay launches or require re-engineering of our digital offerings at short notice.

21. A significant portion of our revenues is dependent on the box office performance of our films.

In the Indian film industry, theatrical revenues are critical because they influence downstream monetization such as sale of satellite rights, OTT licensing and overseas distribution. Poor performance at the domestic box office typically reduces the value of such rights, thereby affecting our revenue streams across the lifecycle of a film. Additionally, box office performance is heavily influenced by external factors such as timing of release, competing films, availability of screens, audience demographics, and prevailing economic conditions. Even films featuring successful directors or leading actors may underperform, adversely impacting our business.

Theatrical performance is a key driver for downstream monetization such as satellite, digital and overseas rights. For example, OMG 2 generated strong first-week collections, which enhanced its OTT and satellite licensing value. Conversely, films that underperform theatrically have limited ancillary value.

Revenue Contribution by Segment:

Particulars	Fiscal 2026	Fiscal 2025	Fiscal 2024
Films & Associated Rights (₹ lakhs)	3,115.20	5,702.82	152.68
% of Total Revenue	23.08%	45.84%	2.79%
Television Programming (₹ lakhs)	6,014.90	6,736. 53	4,412.56
% of Total Revenue	44.56%	54.16%	80.58%
OTT /Web Series Content (₹ lakhs)	4,368.35	-	911.00
% of Total Revenue	32.36%	-	16.64%

A decline in theatrical collections could therefore materially reduce revenues across multiple monetization windows.

22. Our business is exposed to risks from content-related controversies, negative publicity, and social media campaigns, which can harm our reputation, lead to legal action, and impact our financial performance.

The content we produce is subject to public and regulatory scrutiny and may become controversial for reasons such as perceived insensitivity, obscenity, or political bias. Negative public sentiment, often amplified by social media, can lead

to significant consequences, including:

i. ***Legal and Regulatory Scrutiny***: We may face lawsuits, Public Interest Litigations (PILs), or regulatory actions from bodies like the Ministry of Information and Broadcasting, which could result in costly litigation, censorship, or penalties.

ii. ***Financial Impact***: Advertisers may withdraw support from controversial shows, and broadcasters or OTT platforms may be pressured to suspend our content. Viewer boycotts can also lead to lower ratings, reducing the commercial value of our productions.

iii. ***Reputational Damage***: Such incidents can damage our brand and goodwill, making it difficult to attract top creative talent and maintain strong relationships with our business partners. Any significant controversy could materially and adversely affect our business, financial condition, and results of operations.

Based on the disclosures in the "Outstanding Litigation and Material Developments" chapter, our Company has not faced any past instance of content-related controversies leading to PILs, bans, censorship orders, or regulatory action.

23. Our success is primarily dependent on audience acceptance of our films, web series, original digital content and television content, which is inherently unpredictable.

The popularity and commercial success of our content depend on several factors outside our control, including audience tastes, critical reviews, competing releases, for a TV show its time-slot, availability of alternative entertainment, and the reputation of actors and directors involved. Audience preferences in India are diverse and subject to rapid change, making forecasting difficult. A film or show with strong pre-release expectations may still fail commercially if it does not resonate with viewers. Since a significant portion of our revenues come from a small number of successful projects, the underperformance of even one high-budget film or web-series or TV or digital show could materially impact our results. As such, our business model is inherently exposed to volatility and there can be no assurance that future content will meet audience expectations.

24. Fluctuations in foreign exchange rates may adversely affect our business, results of operations and financial condition.

Our Company is exposed to foreign currency exchange rate fluctuations primarily on account of export revenues, import of content, services and equipment, and other transactions denominated in foreign currencies. Any adverse movement in exchange rates may result in increased costs, reduced margins, volatility in earnings and cash flows and may adversely affect our results of operations and financial condition.

We may not be able to accurately predict movements in foreign exchange rates, and there can be no assurance that any hedging arrangements, if undertaken by us in the future, will adequately mitigate the impact of such fluctuations. Further, any inability to pass on increased costs arising from adverse foreign currency movements to customers may have a material adverse effect on our business and profitability.

25. We are exposed to credit risk from our customers and any significant delay or default in the collection of our trade receivables could adversely affect our cash flows and financial condition.

Our business requires us to extend credit to our customers, primarily broadcasters, film studios, OTT platforms and distributors. As on March 31st, 2026 our trade receivables were substantial, standing at Rs. 4,868.71lakhs. While we have improved our collection period, with Days Sales Outstanding ("DSO") at approximately 94 days for Fiscal 2026, any future delays could strain our working capital.

Our receivables ageing schedule as on March 31, 2026, indicates that ₹ 52.90 lakhs were outstanding for over one year. A failure to collect these or other receivables in a timely manner would negatively impact our profitability. Given that a significant portion of our revenue comes from a limited number of clients, any default by a major customer could have a material adverse effect on our business and financial results.

26. Our future growth depends on our unproven digital-first strategy, which includes leveraging emerging generative AI technologies and creating new digital IP. This pivot from our traditional business model exposes us to significant execution, technological, and financial risks.

We are strategically shifting towards becoming a digital-first media company by creating proprietary content for platforms like YouTube, entering the micro-drama market, and utilizing Google's generative AI video platform, VEO 3. This new direction presents several key risks:

- **Execution Risk and Inexperience:** Our success depends on building a B2B to B2C and direct-to-consumer audiences for our new digital ventures, a significant change from our current business-to-business model. There is no assurance that our new content will attract a sufficient audience or that we can effectively monetize it.
- **Dependence on Evolving AI Technology:** Our strategy relies heavily on the success of early-stage AI technologies like VEO 3. This platform may not perform as expected or could face technical limitations and market resistance, jeopardizing our low-cost, rapid content creation plans.
- **Uncertain Return on Investment:** The development of digital IPs requires substantial upfront investment. The monetization models for these ventures are uncertain and may not generate a profitable return, potentially leading to a write-off of our investments.
- **Platform and Partnership Reliance:** Our digital initiatives are dependent on third-party platforms like YouTube and strategic partners like Google. Changes in their algorithms, policies, or our partnership terms are beyond our control and could negatively impact our strategy.

Failure to successfully execute this digital pivot could prevent us from building a valuable IP portfolio and achieving our growth targets, which would adversely affect our business and financial results.

27. Intensifying competition for commissioning slots, talent and IP may lead to cost escalation and margin compression.

We compete with independent producers and large and small production houses that may have greater financial resources, in-house distribution, international format rights, captive talent pools and stronger platform relationship Competition for marquee talent and prime-time slots may inflate budgets, reduce green-light probability and compress producer margins.

28. We have entered into transactions with related parties. We cannot assure you that we could not have achieved more favourable terms if such transactions were not with related parties.

In the ordinary course of business, we have entered into transactions with our Promoters, Directors, and entities in which they have a significant influence. These transactions include.

Name	Relation	Nature of Transaction	Mar-26 (₹ in lakhs)	Mar - 25 (₹ in lakhs)	Mar -24 (₹ in lakhs)
Vipul D. Shah	Director	Remuneration	179.78	–	–
Rajesh Darshan Bahl	Director	Remuneration	119.78	–	–
Pooja Shah	Wife Director	Creative Remuneration	45.00	17.50	30.00

While we believe that all such transactions have been conducted on an arm's-length basis, there can be no assurance that we would not have been able to achieve more favourable terms had these transactions been with unrelated parties. For a detailed list of our related party transactions, please see the chapter titled "Financial Statements as Restated".

29. Our Company has significant outstanding dues and has entered into material transactions with related parties, including loans to a Promoter-Director and substantial receivables from a related LLP, which may result in conflicts of interest, credit risk and adverse impact on our financial condition. Further, we have not filed the statutory form in relation to the issue of shares.

Our Company has entered into various related party transactions in the ordinary course of business with entities and individuals related to our Promoters, Directors and Key Managerial Personnel. As at March 31, 2026 amount aggregating to 1,463.58 lakhs; March 31, 2025: ₹ 2,881.89 lakh; March 31, 2024: ₹ 2,887.42 lakh were outstanding and receivable from Wakaoo Films LLP, a related party in which our Company is a partner. The Company has also undertaken current account contributions, withdrawals, creative crew expenses, and sharing of profits and losses with Wakaoo Films LLP during the last three financial years.

Further, as at March 31, 2026, our Company has granted a loan of ₹ 135.43 lakh to Mr. Rajesh Darshan Bahl, Whole-Time Director, along with interest receivable of ₹ 46.14 lakh (March 31, 2025: loan ₹ 135.43 lakhs and interest ₹ 36.11 lakh; March 31, 2024: loan ₹ 130.43 lakh and interest ₹ 25.68 lakh;). The Company has also entered into other related party transactions with Directors and KMPs including remuneration, reimbursement of expenses, creative crew remuneration and interest income during the last three financial years.

The concentration of a significant portion of our receivables with a related party and the outstanding loan to a Promoter-Director expose us to credit risk, and such transactions may give rise to actual or perceived conflicts of interest. Any delay or default in recovery of these amounts could adversely affect our liquidity, cash flows and financial condition. Additionally, decisions relating to such transactions may not be on the same terms as those with unrelated third parties.

30. We rely on a network of third-party vendors, freelancers, executive producers and line producers for our production activities, and their failure to perform or comply with laws could adversely affect our business.

Our operations are dependent on various external parties, including equipment rental companies, post-production and VFX studios, and a large pool of freelance creative, production and technical talent. Any failure by these third parties to deliver quality services on time can lead to production delays and cost overruns, impacting our client relationships and reputation.

Furthermore, we are exposed to risks if these vendors fail to comply with statutory regulations, such as labour laws (PF/ESI) or tax laws (GST). Such non-compliance could result in financial liabilities and reputational damage to our Company. While we conduct due diligence and include indemnity clauses in our contracts to mitigate these risks, we cannot guarantee complete insulation from the failures of our third-party partners, which could materially harm our business and financial condition.

31. Our business is exposed to risks from content-related controversies, negative publicity, and social media campaigns, which can harm our reputation, lead to legal action, and impact our financial performance.

The content we produce is subject to public and regulatory scrutiny and may become controversial for reasons such as perceived insensitivity, obscenity, or political bias. Negative public sentiment, often amplified by social media, can lead to significant consequences, including:

- **Legal and Regulatory Scrutiny:** We may face lawsuits, Public Interest Litigations (PILs), or regulatory actions from bodies like the Ministry of Information and Broadcasting, which could result in costly litigation, censorship, or penalties.
- **Financial Impact:** Advertisers may withdraw support from controversial shows, and broadcasters or OTT platforms may be pressured to suspend our content. Viewer boycotts can also lead to lower ratings, reducing the commercial value of our productions.
- **Reputational Damage:** Such incidents can damage our brand and goodwill, making it difficult to attract top creative talent and maintain strong relationships with our business partners.

Any significant controversy could materially and adversely affect our business, financial condition, and results of operations.

32. We have in the past reported negative cash flows and may continue to do so in the future. Any negative cash flows in the future would adversely affect our business, financial condition and results of operations.

For the period ended March 31, 2026, we had a negative cash flow from operating activities of ₹ 804.93 lakhs. and ₹ 1,351.26 lakhs from investing activities. Further for the fiscal year ended March 31, 2024, we had a negative cash flow from operating activities of ₹ 280.69 lakhs and for the financial year ended March 31, 2024, we had a negative cash flow from financing activities of ₹ 57.50 lakhs. While we have had positive cash flows in other periods, there is no assurance that we will not experience negative cash flows in the future. Negative cash flows can arise from a variety of factors, including delays in customer payments, increased production costs, and investments in new projects that have not yet begun to generate revenue. Sustained negative cash flows could impact our ability to fund our operations, invest in new content, and meet our debt obligations.

33. We bear the entire risk of completion and commercial success in standalone productions, while in co-productions we may not always retain full monetization rights.

In standalone projects, we are responsible for financing, production, marketing, and distribution, thereby bearing full risks of cost overruns, underperformance or failure. While co-productions allow partial sharing of risks, they often involve compromises on ownership of intellectual property and revenue participation. Consequently, even if a co-produced project achieves success, our share of revenues may be limited. Further, disagreements with co-producers or financiers on creative or commercial matters may delay or disrupt projects. The inherent uncertainty of both models could expose us to financial volatility. For example, our co-productions with T-Series follow a revenue-sharing model, where we retain 50% of IP ownership and profit participation. While this reduces upfront financing burden, it limits our

ability to fully monetize successful projects.

34. ***There are outstanding legal proceedings involving our Company, our Directors, and our Promoters. Any adverse decisions could impact our cashflows and profit or loss to the extent of demand amount, interest and penalty, divert management time and attention and have an adverse effect on our business, prospects, results of operations and financial condition.***

35. ***The media and entertainment industry in India is highly competitive, and our inability to compete effectively could adversely affect our business.***

The Indian media and entertainment industry is fragmented and intensely competitive. We face competition from a diverse range of players, including:

- Established Production Houses: Large, well-funded production houses with extensive libraries of content and established relationships with broadcasters and talent.
- Regional and Niche Players: Smaller production companies that focus on specific regional markets or content genres.
- In-house Production by Broadcasters and OTT Platforms: A growing number of our potential customers are investing in their own content production capabilities.
- Independent Content Creators: The rise of digital platforms has enabled a new generation of independent creators to produce and distribute their own content.

Increased competition could result in pricing pressures, a reduced ability to secure desirable projects, and a potential loss of market share. Our ability to compete effectively will depend on our ability to consistently create high-quality, innovative content that resonates with audiences.

36. ***Our film business is dependent on our strategic partnership with T-Series for project financing and distribution, and***

this collaboration is not governed by a long-term agreement.

Our film production model relies on a project-by-project collaboration with T-Series as one of the film studio, where we develop projects and T-Series provides production financing and distribution in exchange for certain rights and revenue share. This partnership exposes us to significant risks as T-Series is under no obligation to finance our future projects. Our ability to produce films is contingent on securing T-Series' approval or any other Film Studio's approval for each project's creative and commercial viability.

Revenue generated from the strategic partnerships during the last three financial years are as below:

(Amount in Lakhs)

Name of the Strategic Partner	FY, 2026	FY 2025	FY 2024
Super Cassette Industries Pvt Ltd.	1,000.00	3,230.33	Nil
Wakaoo Films LLP	Nil	Nil	Nil

Any failure to obtain their greenlight or to agree upon mutually acceptable commercial terms could result in the stalling or abandonment of a project, leading to the loss of our upfront development costs. Our Company has obtained the requisite No Objection Certificate ("NOC") from Super Cassettes Industries Private Limited, popularly known as T-Series, for inclusion of its name in the Red Herring Prospectus ("RHP"). Any adverse change in this strategic relationship would require us to seek alternative, and potentially less favourable, financing and distribution arrangements, which could materially harm our film business and growth prospects.

37. The media and entertainment industry is subject to rapid technological changes, and our failure to adapt to these changes could harm our business.

The way in which content is created, distributed, and consumed is constantly evolving due to technological advancements. The shift from traditional broadcast television to on-demand streaming through OTT platforms is a prime example of this disruption. To remain competitive, we must be able to adapt to new technologies and platforms.

This may require significant investment in new equipment, software, and talent. If we fail to anticipate and adapt to these technological changes, we risk being left behind by our competitors, which could result in a loss of audience and revenue.

38. Our business is subject to various laws and regulations, and any changes in the regulatory landscape could adversely affect our operations.

The media and entertainment industry in India is governed by a complex web of regulations, including those related to content, broadcasting, intellectual property, and taxation. The regulatory environment is subject to change, and we may be affected by new laws or amendments to existing ones.
For example, changes in the content guidelines issued by the Ministry of Information and Broadcasting could increase our compliance costs or restrict the types of content we are able to produce. Similarly, changes in tax laws, such as the GST regime, could impact our profitability. We cannot predict the impact of any future regulatory changes on our business.

39. Our film production business requires significant upfront investment in projects with long and unpredictable development cycles; any delays or project cancellations could lead to a loss of our investment.

The production of a feature film, from initial concept to its final release, is a lengthy process that can take months or even years to complete. We are required to make substantial upfront investments in activities such as script acquisition, development, talent signing and other pre-production costs, long before any revenue is generated.

The project's progression is contingent on numerous external factors, including the successful casting of actors, finalization of budgets, and securing agreements with studios and co-producers. Delays at any stage can postpone the entire project, and if a film is ultimately abandoned, we may be required to write off our entire capitalized investment. Such write-offs could materially and adversely affect our financial condition and profitability.

40. We may not be able to successfully compete for audiences with films released by other producers and with alternative forms of entertainment.

The Indian media and entertainment industry is intensely competitive with numerous players ranging from large studios to small regional producers. Competition has increased further with global OTT players and international films entering the Indian market. We also face competition from alternative leisure activities, such as gaming, sports, and social media content, which increasingly capture audience attention. Limited screen availability in multiplexes, especially during festive or holiday seasons, exacerbates the problem and may force us to delay releases or settle for suboptimal show timings. High competition also inflates talent costs and marketing budgets, thereby compressing margins.

41. Our revenues and profitability vary across our business verticals, thereby making our future financial results less predictable.

Our revenues and profitability vary significantly across our business verticals such as films, television programming and digital content. For instance, as at March 31, 2026, revenue from Films & Associated Rights was ₹ 3,115.50 lakhs, constituting 23.08% of our total revenue, whereas Television Programming contributed ₹ 6,014.90 lakhs, constituting 44.56%. and OTT/Web Series content contributed ₹ 4,368.35 lakhs, constituting 32.36%. Further during Fiscal 2025, revenue from Films & Associated Rights was ₹5,702.82 lakhs, constituting 45.85% of our total revenue, whereas Television Programming contributed ₹6,736.53 lakhs, constituting 54.16%. In contrast, in Fiscal 2024, television and digital programming accounted for 80.58% of revenues while films contributed only 2.79% and OTT/ Web series contributed ₹ 911.00 lakhs constituting 16.64%. Such wide fluctuations illustrate our dependence on the performance and timing of each vertical.

Our results of operations may therefore fluctuate depending on a number of factors, including but not limited to:

- award of new contracts and contract renewals, and the selection process and timing for performing such contracts, which are subject to contingencies beyond our control;
- the size, complexity, timing of revenue recognition, pricing terms and profitability of significant contracts;
- changes in our pricing policies or those of our competitors;
- the financial condition or business prospects of our clients and co-producers;
- unanticipated variations in the duration, size and scope of our contracts;
- proportion of services revenue from our various business verticals within a reporting period; and
- unanticipated cancellations or contract terminations.

As a result of these factors, our results of operations and cash flows may fluctuate from financial reporting period to period, and past performance may not be a reliable indicator of future results.

42. Our business operations have substantial working capital requirements. Our inability to obtain and / or maintain sufficient cash flow, credit facilities and other sources of funding in a timely manner to meet our requirements of working capital or payment of our debts, could adversely affect our operations.

Our business requires substantial working capital to fund procurement of raw materials, production expenses, employee costs, and operating overheads. Working capital requirements are met through a combination of internal accruals, trade advances, supplier credit, and borrowings such as cash credit facilities, term loans, and other short-term financing. For FY 2026, we assessed working capital requirements at ₹17,675.50 lakhs, of which ₹1,831.04 lakhs are proposed to be met from Net Proceeds of this Issue.

Key components influencing our working capital cycle include:

- Inventory: Inventory levels increased by 26.00% from ₹4,101.32 lakhs in FY 2024 to ₹5,167.79 in FY 2025 and 36.26% in from FY25 to FY26 to ₹ 7,041.48. Inventory holding days stood at 238 days in FY 2026.
- Receivables: Trade receivables rose from ₹ 1,691.30 lakhs in FY 2024 to ₹2,058.55 lakhs in FY 2025 and ₹4868.71 lakhs in FY 2026, with receivable days increasing from 55 days in FY 2025 to 94 days in FY2026, reflecting extended credit to customers.
- Payables: Trade payables increased from ₹1,370.87 lakhs in FY 2024 to ₹2,186.42 lakhs in FY 2025 and ₹2,831.61 FY26, with payable days increasing from 68 days in FY 2025 to 95 days in FY 2026.
- Borrowings: Short-term borrowings decreased from ₹9.44 lakhs in FY 2025 to NIL in FY2026.

While we maintain banking relationships to secure financing flexibility, changes in credit policies, rising interest rates, or restrictive covenants could raise financing costs or constrain access to capital. Any mismatch in our working capital

cycle whether due to delayed collections, increased receivables, or limited supplier credit could strain liquidity and impact our ability to meet operational obligations.

Given the growth trajectory of our business and proposed expansion, our working capital requirements are expected to continue rising. Any inability to secure timely funding, or adverse shifts in credit availability, may materially and adversely affect our business, results of operations, financial condition and cash flows.

For further details, see *"**Restated Financial Statements**"* on page 225 and *"**Objects of the Offer**"* on page 91 of this Red Herring Prospectus.

43. Our profit margins may not be sustainable and could decline due to various cost pressures.

Our Company has recorded an improvement in profit after tax (PAT) margins over the last three financial years, increasing from ₹ 668.79 Lakh in Fiscal 2024 to ₹1,723.76 Lakhs in Fiscal 2024 and further to ₹2,403.77 lakh in Fiscal 2026. While this reflects operational improvements and scaling efficiency, such margins may not be sustainable and are subject to cost pressures that could adversely affect profitability.

Key elements that influence our margins include:

1. Employee expenses: As a manpower-intensive business, salaries, statutory contributions (PF, ESI), gratuity, and training costs represent a significant portion of our expenditure. Employee benefits expense stood at ₹219.94 lakhs in FY24 ₹185.24 lakhs in FY25, and ₹503.27 lakhs in FY 2026. Any increase in wage levels, attrition, or changes in labor laws could adversely impact profitability.
2. Finance costs: Although finance costs declined from ₹11.78 lakhs in FY 2024 to ₹7.63 lakhs in FY 2025 and further to 1.39 lakhs in FY26, any increase in borrowing, refinancing challenges, or interest rate hikes may raise finance costs and reduce margins.
3. Operational expenses: Other expenses increased significantly by ₹76.13 lakhs in FY 2026 as compared to FY 2025. Future increases in technology investments, compliance costs, insurance, legal or administrative overheads could further pressure margins.
4. Regulatory and compliance costs: Non-compliances or delayed filings in GST, TDS, PF and ESI observed in prior years may also lead to penalties and affect profitability.
5. While our management continues to adopt measures to improve operational efficiency, diversify revenue streams and maintain cost discipline, investors should recognize that profit margins are inherently volatile and subject to pressures. There can be no assurance that current levels of profitability will be sustained in the future.

44. We have certain contingent liabilities that have been disclosed in the Restated Financial Information, which if they materialize, may adversely affect our business, results of operations, financial condition and cash flows.

As of March 31, 2026, contingent liabilities that have been disclosed in our Restated Financial Statements, are as follows:

Sr. No.	Particulars	For the Period ended on March 31, 2026 (Amount in Lakhs)
(A)	Claims against the company not acknowledged as debts	Nil
(B)	Indirect Tax-GST Demand	22.73
(C)	Others	Nil

If a significant portion of these liabilities materialize, it could have an adverse effect on our business, results of operations, financial condition and cash flows.

For further details in relation to the contingent liability, see Annexure XXXX under Chapter titled 'Restated Financial Information' on *page 225* this Red Herring Prospectus

45. Our success also depends on our ability to attract, hire, train and retain skilled permanent and temporary personnel. An inability to recruit, train and retain suitably qualified and skilled personnel could adversely impact our business, results of operations, financial condition and cash flows.

Our business depends significantly on our ability to attract and retain qualified permanent and temporary personnel who

possess the skills and experience necessary to meet the requirements of our projects. Our business depends significantly on our ability to attract and retain qualified permanent and temporary personnel who possess the skills and experience necessary to meet the requirements of our projects. As on date of this RHP , we had 38 Employees (Including Monthly Consultants) and engaged on an average between 150-170 professionals across film, web series or any TV project basis. Our operations and financial performance may be adversely affected if we are unable to find sufficient personnel for our projects. We must continually evaluate and upgrade our pool of available professionals through recruiting and training programs to keep pace with evolving client requirements, technological advances and changing industry standards. The cost of providing our services and the extent to which we utilize our workforce directly impacts our profitability. Our employee-related expenses were ₹219.94 lakhs in FY 2023-24 (representing 4.01% of revenue from operations) as compared to ₹185.24 Lakhs in FY 2024-25 and it increased to ₹ 503.27 Lakhs. Furthermore, our revenue per employee rose to ₹355.23 lakhs in FY 2026 as compared to ₹ 148.01 lakhs in FY 2024, reflecting a greater reliance on efficient staffing deployment. Our profitability may suffer if we are not able to maintain adequate staffing for our contracts due to attrition, inability to transition employees between projects, or failure to assimilate new hires in time. Further, we are subject to stringent labour laws, and any non-compliance could lead to penalties or suspension of certain operations. In addition, rising compensation and benefit costs whether due to regulatory increases in minimum wages or higher wage demands from employees could adversely affect our margins. Accordingly, an inability to attract, retain and effectively manage our personnel base could materially and adversely impact our business, results of operations, financial condition and cash flows. For further details regarding our permanent and contractual employees, see head "Human Resource" under the Chapter titled "Our Business" on page 137 of this Red Herring Prospectus.

46. We are required to obtain, maintain or renew statutory and regulatory licenses in respect of our principal business lines, and if we fail to do so, in a timely manner or at all, we may be unable to fully or partially operate our businesses and our results of operations may be adversely affected.

Our business requires several approvals, licenses, registrations and permits from central, state and local government authorities in India. These include, among others, registration under the Maharashtra Shops & Establishments Act, GST, Importer–Exporter Code, Employees' Provident Fund, Employees' State Insurance registrations, and certifications from the Central Board of Film Certification prior to release of films. In addition, we own and maintain various intellectual property registrations, including trademarks valid up to 2025–2029.

Many of these approvals are valid for a limited period and require renewal. Failure to apply for or secure renewals on time may affect our ability to continue operations. While, as of the date of this Red Herring Prospectus, there are no material approvals pending renewal or yet to be obtained, we cannot assure that we will always be able to comply with evolving requirements. These approvals are subject to various conditions, and any alleged or actual non-compliance may result in suspension, revocation, penalties, or disruption of operations.
Furthermore, changes in laws or regulations applicable to our business such as amendments to the Cinematograph Act, 1952 and labour regulations or adverse interpretation by regulatory or judicial authorities, may result in increased costs, stricter compliance obligations, or restrictions on operations. If we fail to obtain, maintain, or renew such approvals and licenses in a timely manner, our business, financial condition, results of operations and cash flows could be adversely affected.

For further details on key regulations, see the Chapter titled *"**Key Regulations and Policies**"* on page 173 and for details of statutory approvals, refer to the Chapter titled *"**Government and Other Approvals**"* on page 251 of this Red Herring Prospectus.

47. Any IT system failures or lapses on the part of any of our employees may lead to operational interruption, liabilities, or reputational harm.

The success of our business depends, in part, on our ability to effectively deploy, implement, and use information technology systems and advanced technology initiatives in a cost-effective and timely manner. Our computer networks may be vulnerable to unauthorized access, computer hacking, viruses, worms, malicious applications, and other security issues caused by unauthorized access to, or improper use of, systems by our employees, subcontractors, or third-party vendors.

In the past three fiscal years, our company has not experienced any IT system failures. However, in the future, any system failure, security breach, or lapse on our part, or by our employees and other ecosystem participants, that results in the release of user data could damage our reputation and brand, thereby negatively impacting our business. This could also expose us to potential legal liability. Any such legal proceedings or actions may subject us to significant penalties and negative publicity, require changes in our business practices, increase our costs, and severely disrupt our operations.

48. If we are unable to collect our receivables from our clients, our results of operations and cash flows could be adversely affected.

Cash collection trends measured by days outstanding have a material impact on the cash receipts and, consequently, on our cash flows. In general, an increase in bad debts or aged debtors leads to greater usage of operating working capital and increased interest costs. The table below sets forth trade receivables, bad debts, trade receivable turnover ratio, trade receivable days:

(₹ in Lakhs)

Particulars	FY2025-26	FY 2024-25	FY 2023-24
Trade receivable	4,868.71	2,058.55	**1,691.30**
Bad debts and Provisions	0	0	**0**
Trade receivable turnover ratio	3.90	6.63	**5.61**
Trade receivable days	**94**	**55**	**65**

Trade receivables turnover ratio is calculated as revenue from operations divided by average trade receivables. Average trade receivables are calculated as the average of opening trade receivables and closing trade receivables

The holding period level (in days) of Trade Receivables is calculated by dividing average trade receivables by revenue from operations multiplied by number of days in the year/period (365).
We typically bill and collect on relatively short cycles. If we experience an increase in the time to bill and collect for our services, our cash flows could be adversely affected. Actual losses on client balances could differ from those that we anticipate and as a result we might need to adjust our provisions.

Macroeconomic conditions could result in financial difficulties, including insolvency or bankruptcy, for our clients, and as a result could cause clients to delay payments to us, request modifications to their payment arrangements that could increase our receivables balance, or default on their payment obligations to us. While we have experienced slight delays in collecting our receivables from counterparties under client contracts in the past due to COVID-19, these delays have not had a material adverse impact on our overall cash flows. We did not make any provision in connection with such delays. However, we cannot assure you that any delay or default in payments by our clients in the future will not affect our cash flows which in turn may adversely affect our results of operations and financial condition. Recovery of our receivables and timely collection of client balances also depends on our ability to complete our contractual commitments and bill and collect our contracted revenue. If we are unable to meet our contractual requirements, we might experience delays in collection of and/or be unable to collect our client balances, and if this occurs, our results of operations and cash flows could be adversely affected.

49. Our success also depends on our ability to attract, hire, train and retain skilled permanent and temporary personnel. An inability to recruit, train and retain suitably qualified and skilled personnel could adversely impact our business, results of operations, financial condition and cash flows.

Our business depends significantly on our ability to attract and retain qualified permanent and temporary personnel who possess the skills and experience necessary to meet the requirements of our projects. As on date of this RHP we had 38 Employees across departments such as production, legal & compliance, finance, administration, and creative content. In addition, for our production-related activities, we engage on average 150 to 170 skilled professionals and unskilled labor per project, covering roles such as writers, directors, costume designers, cinematographers, casting director, executive producers, production designers, line producers, sound recordists, and editors.

Our operations and financial performance may be adversely affected if we are unable to find sufficient personnel for our projects. We must continually evaluate and upgrade our pool of available professionals through recruiting and training programs to keep pace with evolving client requirements, technological advances and changing industry standards.

The cost of providing our services and the extent to which we utilize our workforce directly impacts our profitability. Our employee-related expenses were ₹219.94 lakhs in FY 2023-24 (representing 4.02% of revenue from operations), and ₹185.24 lakhs in FY 2025 (1.49% of revenue).

In FY 2025-26, employee benefit expenses increased further. Furthermore, our revenue per employee rose to ₹355.23 lakhs in FY 2026 compared to ₹148.01 lakhs in FY 2024, reflecting a greater reliance on efficient staffing deployment.

Our profitability may suffer if we are not able to maintain adequate staffing for our contracts due to attrition, inability to transition employees between projects, or failure to assimilate new hires in time. Further, we are subject to stringent labour laws, and any non-compliance could lead to penalties or suspension of certain operations. In addition, rising compensation and benefit costs whether due to regulatory increases in minimum wages or higher wage demands from employees could adversely affect our margins.
Accordingly, an inability to attract, retain and effectively manage our personnel base could materially and adversely impact our business, results of operations, financial condition and cash flows.

For further details regarding our permanent and contractual employees, see head "***Human Resource***" under the Chapter titled ***"Our Business"*** on page 137 of this Red Herring Prospectus.

50. The schedule of our estimated deployment of Net Proceeds is subject to inherent uncertainties

The fund requirement and deployment are based on internal management estimates and our Company's current business plan and are subject to change considering changes in external circumstances or costs, other financial conditions, business or strategy. These estimates have not been appraised by any bank or financial institution. In view of the dynamic nature of the sector and specifically that of our business, we may have to revise our expenditure and fund requirements because of variations in cost estimates, and external factors which may not be within the control of our management. This may entail rescheduling and revising the planned expenditures and fund requirements and increasing or decreasing expenditures for a particular purpose at the discretion of our management, within the objects. For further details refer to "Objects of the Offer" beginning on page no. 91.

51. We depend on the skills and experience of our Promoters, Key Managerial Personnel, Senior Management for our business and future growth.

We primarily benefit from the strategic guidance of our individual Promoters. If their involvement in our business reduces in the future, we may be unable to implement our plans as anticipated or maintain administrative control as we currently do, which in turn could adversely affect our business, results of operations, financial condition and prospects. Furthermore, our future performance will also depend on the continued service of our Key Managerial Personnel and Senior Management and the loss of any such employee and the inability to find an adequate replacement may adversely affect our business, results of operations, financial condition.

For details of our Key Managerial Personnel and Senior Management, see head Key Managerial Personnel and Senior Management *Personnel under the Chapter titled "**Our Management**" each on page* 189 of this *Red Herring* Prospectus.

52. We may require raising additional equity or debt in the future in order to continue to grow our business, which may not be available on favorable terms or at all.

Our strategy to grow our business may require us to raise additional funds or refinance our existing debt for our working capital or long-term loans. We cannot assure that such funds will be available on favorable terms or at all. Additional debt financing may increase our financing costs. Our financing agreements may contain terms and conditions that may restrict our ability to operate and manage our business, such as terms and conditions that require us to maintain certain pre-set debt service coverage ratios and leverage ratios and require us to use our assets, including our cash balances, as collateral for our indebtedness. If we decide to raise additional funds through the incurrence of debt, our interest and debt repayment obligations will increase, and could have a significant effect on our profitability and cash flows. Any issuance of equity to raise additional funds, on the other hand, would result in a dilution of the shareholding of existing shareholders. If we are unable to raise additional funds on favorable terms or at all as and when required, our business, results of operations, financial condition and prospects could be adversely affected.

53. Failures in internal control systems could cause operational errors which may have an adverse effect on our reputation, business, results of operations, financial condition and cash flows.

We rely extensively on our information systems and network infrastructure for day-to-day operations, particularly in areas such as identification and matching of staffing resources to client assignments, billing and collections, and vendor or consultant payments. Any failures or lapses in these systems could lead to operational errors. While we have implemented security measures such as firewalls, password encryption and annual maintenance contracts with third-party vendors to manage IT infrastructure, such systems may not be sufficient to prevent sophisticated cybersecurity threats or operational breakdowns.
Cybersecurity risks are constantly evolving and could result in unauthorized access, loss or corruption of data, and disclosure of confidential or sensitive information. A successful cyberattack or internal control failure could lead to:

- disruption of business operations and project delivery;
- financial loss due to fraud, theft or data misuse;
- litigation and regulatory investigations;
- penalties under the Information Technology Act, 2000 and related rules
- reputational damage and erosion of client trust; and
- increased overhead costs to restore or upgrade systems.

Although we have not experienced any material IT failures or security breaches in the past three fiscal years, we cannot assure that such incidents will not occur in the future. Any unavailability of systems, or failure of internal controls to perform as intended, could adversely impact our reputation, business, results of operations, financial condition and cash flows.

54. After the completion of the Offer, our Promoters & Promoter Group will continue to collectively hold majority of the shareholding in our Company, which will allow them to influence the outcome of matters requiring shareholder approval.

As on the date of this Red Herring Prospectus, our Promoters and Promoter Group collectively hold 77.61% of the pre-Offer shareholding of our Company . For details of their pre- and post-Offer shareholding, please refer to the Chapter titled *"Capital Structure"* beginning on page 76 of this Red Herring Prospectus.
Following the completion of the Offer, our Promoters and Promoter Group will continue to hold a majority of our Equity Shares and accordingly will exercise significant influence over our Company's policies, business strategies and decisions on matters requiring shareholder approval. These include, among others, appointment and removal of directors, approval of mergers, demergers, acquisitions, joint ventures or sale of substantial assets, capital allocation, dividend policies, lending, borrowings and investments, and any other matters requiring a special resolution under applicable law.
This concentration of ownership could also:

- delay, defer, or prevent a change in control of our Company;
- discourage potential takeover attempts that other shareholders may consider beneficial; and
- make certain transactions more difficult or impossible without the support of the Promoters.

The interests of the Promoters, as controlling shareholders, may not always align with the interests of minority shareholders. We cannot assure you that the Promoters will act to resolve any conflicts of interest in our favour. Any divergence in interests could adversely affect our ability to execute our business strategies or operate effectively.

For further information on the interests of our Promoters, see the Chapters titled ***"Our Promoters and Promoter Group"*** (page 211) and ***"Our Management"*** (page 189) of this Red Herring Prospectus.

55. All the Directors of our Company do not have prior experience of directorship in any of companies listed on recognized stock exchanges, therefore, they will be able to provide only a limited guidance in relation to the affairs of our Company post listing

Our directors do not have prior experience as directors of companies listed on recognized stock exchanges. directors of listed companies have a wide range of responsibilities, including, among others, ensuring compliance with continuing listing obligations, monitoring and overseeing management, operations, financial condition and trajectory of the company. We cannot assure you that our directors will be able to adequately manage our Company after we become a listed company, due to their lack of prior experience as directors of companies listed on recognized stock exchanges. Accordingly, we will get limited guidance from them and accordingly, may fail to maintain and improve the effectiveness of our disclosure controls, procedures and internal control as required for a listed entity under the applicable law.

56. In addition to normal remuneration or benefits and reimbursement of expenses, some of our Promoters and/ or Directors are interested in our Company to the extent of their shareholding and dividend entitlement thereon in our Company.

Our Promoters and Directors are interested in our Company to the extent of:

- their individual and collective shareholding in the Company, and the dividend entitlement thereon;
- remuneration and benefits payable to them for services rendered in their capacity as Directors or otherwise; and
- reimbursement of expenses incurred in the ordinary course of business.

As on the date of this Red Herring Prospectus, certain of our Directors hold an aggregate of 55,45,800 Equity Shares, representing 30.36% of our pre-Offer paid-up equity share capital . For details, please refer to the Chapter titled *"Capital Structure"* on page 76. Further, directors are entitled to variable remuneration of 2.5% of the profit before tax of the preceding financial year, subject to shareholder approval, in addition to sitting fees for attending Board and Committee meetings .

Additionally, our Promoters and members of the Promoter Group may be deemed to be interested in the Related Party Transactions disclosed in the Chapter *"Restated Financial Statements"* beginning on page 225 of this Red Herring Prospectus.

Accordingly, the interests of our Promoters and Directors as shareholders and recipients of remuneration and benefits may not always align with those of other shareholders. For further details, see the Chapters titled ***"Capital Structure"*** (page 76) and ***"Our Management"*** (page 189) of this Red Herring Prospectus.

For further information, see chapter titled ***"Capital Structure"*** *and* ***"Our Management"*** *on page 76, and page* 189, respectively *of this Red Hearing Prospectus.*

57. The requirements of being a publicly listed company may strain our resources. Further non compliances of the regulatory requirements applicable to publicly listed companies may lead to suspension of our Company

We are not a publicly listed company and have not, historically, been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the Listing Regulations, which will require us to file audited annual and unaudited half-yearly reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or, we may not be able to readily determine and accordingly report any changes in our results of operations as promptly as other listed companies. Further, as a publicly listed company, we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management attention will be required. As a result, our management's attention may be diverted from our business concerns, which may adversely affect our business, prospects, results of operations and financial condition.

58. The average cost of acquisition of Equity by our Promoters and promoter group could be lower than the Offer Price

Our Promoters' average cost of acquisition of Equity Shares in our Company is as follows:

Name of the Promoter and promoter group	No. of Shares held	Average Cost of Acquisition per Share (In ₹)
Vipul D. Shah	48,77,600	7.32

Data *as certified by Statutory Auditor, M/s B D G & Co LLP, Chartered Accountants, by way of their certificate dated July 21, 2026-; UDIN – 26161220VJESPP9918*

59. Our Company may not be able to pay dividends in the future. Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements and capital expenditures and the terms of our financing arrangements.

Any dividends to be declared and paid in the future are required to be recommended by our Board of Directors and approved by its Shareholders, at their discretion, subject to the provisions of the Articles of Association and applicable law, including the Companies Act. Our Company's ability to pay dividends in the future will depend upon our future results of operations, financial condition, cash flows, sufficient profitability, working capital requirements and capital expenditure requirements. We cannot assure you that we will generate sufficient revenues to cover our operating expenses and, as such, pay dividends to our Company's shareholders in future consistent with our past practices, or at all.

*For details relating to the payment of dividend in the past and the dividend policy of our company kindly refer chapter titled **"Dividend Policy**" on page 224 of this Red Herring Prospectus.*

EXTERNAL RISKS

61. Changing regulations in India could lead to new compliance requirements that are uncertain. The regulatory environment in which we operate is evolving and is subject to change.

The Government of India may implement new laws or other regulations that could affect or the sectors we serve, which could lead to new compliance requirements. New compliance requirements could increase our costs or otherwise adversely affect our business, financial condition and results of operations. Further, the manner in which new requirements will be enforced or interpreted can lead to uncertainty in our operations and could adversely affect our operations. Our business and financial performance could be adversely affected by any unexpected or onerous requirements or regulations resulting from any changes in laws or interpretation of existing laws, or the promulgation of new laws, rules and regulations. Any such changes and the related uncertainties with respect to the implementation or change in the legal framework may have a material adverse effect on our business, financial condition and results of operations.

62. Malpractices by some players in the industry affect overall performance of emerging Companies.

The industry in which our Company operates is subject to risk associated with unethical business practices such as unethical marketing, dishonest advertising, questionable pricing practices, inaccurate claims with regards to safety and efficacy of the product etc. Consumers' attitude toward the industry today is dominated by a sense of mistrust, paving a way for regulators for stricter entry barriers and introduction of code of conducts; making the entire industry environment regulated and controlled. Malpractices by some players in the industry affects the overall performance of the emerging Companies like us as the industry norms are applicable to all at parity. Any unethical business practices by any industry player or intermediary may impact our business and results of operations.

63. General economic and market conditions in India and globally could have a material adverse effect on our business, financial condition, cash flows, results of operations and prospects.

Our business is highly dependent on economic and market conditions in India and other jurisdictions where we operate. General economic and political conditions in India, such as macroeconomic and monetary policies, industry-specific trends, mergers and acquisitions activity, legislation and regulations relating to the financial and securities industries, household savings rate, investment in alternative financial instruments, upward and downward trends in the market, business and financial sectors, volatility in security prices, perceived lack of attractiveness of the Indian capital markets, inflation, foreign direct investment, consumer confidence, currency and interest rate fluctuations, availability of short-term and long-term market funding sources and cost of funding, could affect our business. Global economic and political conditions may also adversely affect the Indian economic conditions. Market conditions may change rapidly, and the Indian capital markets have experienced significant volatility in the past. The Indian economy has had sustained periods of high inflation in the recent past. If inflation or real interest rates were to rise significantly, the trends towards increased financial savings might slow down or reverse, our employee costs may increase and the overall revenue may decline.

64. You may be subject to Indian taxes arising out of capital gains on the sale of the Equity Shares.

Under current Indian tax laws, unless specifically exempted, capital gains arising from the sale of equity shares in an Indian company is generally taxable in India. Investors may be subject to payment of long - term or short - term capital gains tax in India, in addition to payment of Securities Transaction Tax (" STT"), on the sale of any Equity Shares held for more or less than 12 months immediately preceding the date of transfer. While non-residents may claim tax treaty benefits in relation to such capital gains income, generally, Indian tax treaties do not limit India's right to impose a tax on capital gains arising from the sale of shares of an Indian company.

The Government of India announced the interim union budget for Financial Year 2025-2026, following which the Finance Bill, 2025 ("Finance Bill") was introduced in the Lok Sabha on February 1, 2024. The Finance Bill received the assent from the President of India and became the Finance Act, 2025, with effect from April 1, 2025.

Further, pursuant to amendments notified by the Finance (No. 2) Act, 2024, long term capital gains exceeding the exempted limit of ₹125,000 arising from the sale of listed equity shares on the stock exchange are subject to tax at the rate of 12.5% (plus applicable surcharge and cess), without benefit of indexation. Further, any capital gains realized on the sale of listed equity shares held for a period of 12 months or less immediately preceding the date of transfer will be subject to short term capital gains tax at the rate of 20% (plus applicable surcharges and cess) for transfers taking place after July 23, 2024. A securities transaction tax ("STT") will be levied on and collected by an Indian stock exchange on which our Equity Shares are sold.

Any gain realized on the sale of our Equity Shares other than on a recognized stock exchange (where no STT has been paid), will also be subject to short term capital gains tax or long - term capital gains tax, at such rates as may be applicable under the Income Tax Act. Further, capital gains arising from the sale of our Equity Shares will be exempt 96 from taxation in India in cases where an exemption is provided under a treaty between India and the country of which the seller is a resident, subject to certain conditions being met. Subject to any relief available under an applicable tax treaty or under the laws of their own jurisdictions, residents of other countries may be liable for tax in India as well as in their own jurisdictions on gains arising from a sale of our Equity Shares. Investors are advised to consult their own tax advisors to understand their tax liability as per the laws prevailing on the date of disposal of Equity Shares.

The Finance Act, 2019 amended the Indian Stamp Act, 1899 with effect from July 1, 2020 and clarified that, in the absence of a specific provision under an agreement, the liability to pay stamp duty in case of sale of securities through stock exchanges will be on the buyer, while in other cases of transfer for consideration through a depository, the bonus will be on the transferor. The stamp duty for transfer of certain securities, other than debentures, on a delivery basis is currently specified at 0.015% and on a non - delivery basis is specified at 0.003% of the consideration amount.

Under the Finance Act 2020, any dividends paid by an Indian company will be subject to tax in the hands of the shareholders at applicable rates. Such taxes will be withheld by the Indian company paying dividends. The Company may or may not grant the benefit of a tax treaty (where applicable) to a non - resident shareholder for the purposes of deducting tax at source pursuant to any corporate action including dividends. Investors are advised to consult their own tax advisors and to carefully consider the potential tax consequences of owning Equity Shares.

Investors are advised to consult their own tax advisors to understand their tax liability as per the laws prevailing on the date of disposal of Equity Shares. Further, pursuant to the Finance Act 2024 II, any payment received by the shareholders from the Company pursuant to buyback of shares undertaken after October 1, 2024 on account of buy back of shares shall be taxable as dividend and no deduction from such dividend income shall be allowed.

We cannot predict whether any amendments made pursuant to the Finance Acts would have an adverse effect on our business, results of operations and financial condition. Unfavorable changes in or interpretations of existing laws, rules and regulations, or the promulgation of new laws, rules and regulations including foreign investment and stamp duty laws governing our business and operations could result in us being deemed to be in contravention of such laws and may require us to apply for additional approvals.

65. Significant differences exist between Indian GAAP and other accounting principles, such as U.S. GAAP and IFRS, which may be material to the financial statements, prepared and presented in accordance with SEBI ICDR Regulations contained in this Red Herring Prospectus.

As stated in the reports of the Auditor included in this Red Herring Prospectus under chapter ***"Financial Statements as Restated"*** beginning on page 225 the financial statements included in this Red Herring Prospectus are based on financial information that is based on the audited financial statements that are prepared and presented in conformity with Indian GAAP and restated in accordance with the SEBI ICDR Regulations, and no attempt has been made to reconcile any of the information given in this Red Herring Prospectus to any other principles or to base it on any other standards. Indian GAAP differs from accounting principles and auditing standards with which prospective investors may be familiar in other countries, such as U.S. GAAP and IFRS. Significant differences exist between Indian GAAP and U.S. GAAP and IFRS, which may be material to the financial information prepared and presented in accordance with Indian GAAP contained in this Red Herring Prospectus. Accordingly, the degree to which the financial information included in this Red Herring Prospectus will provide meaningful information is dependent on familiarity with Indian GAAP, the Companies Act and the SEBI ICDR Regulations. Any reliance by persons not familiar with Indian GAAP on the financial disclosures presented in this Red Herring Prospectus should accordingly be limited.

66. Political instability or a change in economic liberalization and deregulation policies could seriously harm business and economic conditions in India generally and our business.

The Government of India has traditionally exercised and continues to exercise influence over many aspects of the economy. Our business and the market price and liquidity of our Equity Shares may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. The rate of economic liberalization could change, and specific laws and policies affecting the information technology sector, foreign investment and other matters affecting investment in our securities could change as well. Any significant change in such liberalization and deregulation policies could adversely affect business and economic conditions in India, generally, and our business, prospects, financial condition and results of operations, in particular.

67. Financial instability in Indian Financial Markets could adversely affect our Company's results of operation and financial condition.

In this globalized world, the Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, say in the United States of America, Europe, China or other emerging economies, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil. Any prolonged financial crisis may have an adverse impact on the Indian economy, thereby resulting in a material and adverse effect on our Company's business, operations, financial condition, profitability and price of its Shares. Stock exchanges in India have in the past experienced substantial fluctuations in the prices of listed securities.

68. We cannot guarantee the accuracy or completeness of facts and other statistics with respect to India, the Indian economy and our industry contained in the Red Herring Prospectus.

While facts and other statistics in this Red Herring Prospectus relating to India, the Indian economy and our industry has been based on various government publications and reports from government agencies that we believe are reliable, we cannot guarantee the quality or reliability of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the chapter titled "Our Industry" beginning on page 113. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy elsewhere.

69. Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency a magnitude, which may negatively affect our stock prices.

70. Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection / tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

71. Natural calamities could have a negative impact on the Indian economy and cause Our Company's business to suffer.

India has experienced natural calamities such as earthquakes, tsunami, floods etc. In recent years, the extent and severity of these natural disasters determine their impact on the Indian economy. Prolonged spells of abnormal rainfall or other natural calamities could have a negative impact on the Indian economy, which could adversely affect our business, prospects, financial condition and results of operations as well as the price of the Equity Shares.

72. Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

Bid Quantity	Amount (₹)	Cumulative Quantity	Subscription

[●]	**[●]**	**[●]**	**[●]**
[●]	**[●]**	**[●]**	**[●]**

The projected increase in inventory is directly linked to an increase in the business volume and also a greater shift in business model from being an execution partner on third-party projects to creating and owning intellectual property across television, Films, OTT and digital platforms. In the earlier model, the Company worked on externally originated ideas, resulting in shorter execution cycles and limited inventory recognition. Under the new model, the Company will initiate, develop and execute multiple projects simultaneously, which requires incurring costs at the concept, scripting, production and post-production stages before revenue is realized. Inventory will therefore consist of development costs for concepts and scripts under creation, production expenses for projects in progress, and completed content pending release or sale to platforms. As the number of proprietary projects increases, a larger portion of operating expenditure will remain capitalized as inventory until monetization and is consistent with industry norms for expanding film and OTT production companies. Costs such as writer fees, director and artist contracts, location and production expenses, rights acquisition and technical post-production work will form much of this build-up.

The increase in inventory levels is therefore a planned outcome of increasing business volume and scaling up IP-led content creation. Once the projects are released or licensed, the corresponding inventory will be expensed, resulting in a natural correction in inventory levels in later periods for those set of projects while taking up new content creation / business.

**** Debtor days, creditor days, and inventory days for FY24 have been calculated using the closing balances of trade receivables, trade payables, and inventory, respectively.***

- The holding period level (in days) of Trade Receivables is calculated by dividing average trade receivables by revenue from operations multiplied by number of days in the year/period (365).
- Holding period level (in days) of Trade Payables is calculated by dividing Trade Payables Days by Operating expenses multiplied by number of days in the year/period (365).
- Inventory Holding Period (Days) = (Average Inventory / Cost of Production or COGS) × 365
- Justification for "Holding Period" levels derived from our Restated Financial Statements

1. Overview of Working Capital Projections

Based on the projections approved by the Board, the Company's Working Capital Requirement (WCR) is projected to grow from **₹16,337.95 Lakhs in FY 2027** to **₹20,568.69 Lakhs in FY 2028**.

The WCR components comprise:

- **Trade Receivables** rising from **₹ 6,010.20 Lakhs in FY 2027** to **₹7,500.03 Lakhs in FY 2028.**
- **Inventories** increasing from **₹ 12,017.08 Lakhs in FY 2027** to **₹15,089.40 Lakhs in FY 2028.**
- **Trade Payables** maintained at lower levels with creditor days maintained at **40 days in FY 2026–27** and **FY 2027–28.**
- These projections reflect the unique working capital dynamics of a content production company in the media and entertainment industry.

2. Justification of Holding Period for Debtors (Trade Receivables)

Debtor Days – 85 days (FY 2026-27 and FY 2027-28).
Rationale

- Project & Milestone-Based Payments: Payments are linked to delivery of scripts, episodes, or final content, naturally extending realization timelines.
- Dependence on Broadcasters/OTT Platforms/Studios: Industry practice of 60–90 day payment cycles, extending up to 100 days in cases involving government/statutory approvals.
- High Pre-Production Costs: Substantial outflows are incurred before billing milestones are reached, creating longer receivable cycles.
- Industry Norms: Entertainment industry receivable cycles generally fall between 75–90 days.

Conclusion: The projection of ~85 debtor days is reasonable and aligns with milestone-based billing and the nature of the Company's customer base.

3. Justification of Holding Period for Trade Payables (Creditors)

Creditor Days – 40 days (FY 2026-27 and FY 2027-28)
Rationale

- Low Material Cost Structure: Major costs relate to talent, crew, and production services rather than raw materials.
- Vendor Management & Contracts: Many vendors work on short-term or project-based contracts, requiring faster settlements.
- IPO Proceeds & Liquidity: Improved liquidity enables timely settlement of dues.
- Industry Practice: Service vendors in this sector generally operate on shorter credit terms (30–60 days).

Conclusion: Maintaining creditor days at 40 aligns with the Company's operating model, industry norms, and financial flexibility post-IPO.

4. Inventory Holding & Rationale

Inventories projected to rise from ₹ 12,017.08 Lakhs in FY 2027 to ₹15,089.40 Lakhs in FY 2028.

Rationale

- Work-in-Progress Content: Includes films, series, and digital content under production—scripts, shooting footage, and post-production edits.
- Long Production Cycles: Content production spans several months, leading to higher WIP inventory.
- Library Content & IP: Completed but unreleased content and acquired IP rights.
- Expansion Plans: Growth in the production pipeline necessitates higher content inventory.

Conclusion: Rising inventory levels reflect industry production cycles and the Company's expansion strategy.

5. Year-Wise Detailed Rationale for Increase in Working Capital Requirements (Past 3FY)

The increase in WCR is attributable to several factors inherent to the content production industry:

(a) Expansion of Projects & Scale: Larger slate of films, web series, and digital projects requiring upfront investment.
(b) Receivable Cycles: Broadcasters/OTTs operate on 75–90 day cycles, occasionally longer.
(c) High Pre-Production & Talent Costs: Substantial costs precede invoicing.
(d) IPO Proceeds: Reduce reliance on trade payables, allowing quicker settlements.

(e) Industry Alignment: Increase in WCR from ₹ 5,649.55 Lakhs in FY 2024 to ₹20,568.69 Lakhs in FY 2028 is proportionate to revenue and pipeline expansion.

6. Summary Table Linking Projections

Year (Projected)	Inventory (₹ Lakhs)	Debtor Days	Creditor Days	WCR (₹ Lakhs)
FY 2026-27	12,017.08	85 days	40 days	16,337.95
FY 2027-28	15,089.40	85 days	40 days	20,568.69

7. Conclusion for RHP

The Company's working capital requirements are driven by its project-based model, with upfront investments in content creation recovered after delivery and approval cycles by major OTT/broadcast clients.

- Debtors: Justified at ~85 days due to milestone-based billing and industry payment cycles.
- Trade Payables: Maintained at low levels (40–35 days) consistent with service-oriented cost structure and liquidity from IPO proceeds.
- Inventory: High due to ongoing and unreleased projects, consistent with production cycles.

The working capital framework supports sustainable growth, timely content delivery, retention of talent, and execution of high-quality productions in line with industry norms and the Company's expansion strategy.

Pursuant to the certificate dated July 21, 2026, M/s. B D G & Co LLP, Chartered Accountants, peer reviewed auditor have verified the working capital requirements for the year ended on March 31, 2026, March 31, 2025, March 31, 2024 from the Restated Financial Information and working capital estimates for the financial year 2026 as approved by the Board pursuant to its resolution dated July 21, 2026.

Receivable Days: The projected increase in receivable days is attributable to a change in the Company's business model. Historically, the Company operated as an execution partner, working on third-party concepts with shorter project cycles and billing structures, resulting in faster collections. Going forward, the Company intends to originate and develop proprietary content across television, Film, OTT platforms and digital formats. As a result, the scale, duration and value of projects are expected to increase significantly. Large broadcasters, OTT platforms and corporate clients typically operate on milestone-based payment structures with longer payment cycle. As the proportion of such clients increases in the revenue mix, the overall receivable cycle is expected to increase.

Additionally, longer project gestation periods result in a higher portion of revenue being recognized at later stages, increasing the average credit period. The projected 85-day receivable cycle is therefore consistent with the expected shift in revenue model, client base and project size. The Company has adopted measures to ensure that the longer receivable cycle does not adversely affect liquidity or funding of ongoing projects. The Company will continue to follow milestone-based billing for our existing cost plus margin business model to ensure that partial payments are received during various execution stages rather than at completion. This reduces concentration risk and smoothens cash inflows during the project lifecycle.

The Company is also strengthening its receivable monitoring mechanism through periodic ageing analysis, client-specific credit tracking and escalation protocols for delays. Expansion of the client base across broadcasters, OTT platforms and digital aggregators is expected to reduce dependency on any single counterparty. Further, project-wise cash flow planning will be aligned with expected receipt schedules so that payments to writers, artists, directors and production vendors are matched with milestone-based inflows. With these measures, the Company expects to maintain disciplined working capital management and does not foresee an adverse impact on operating cash flows. The timing of receivable recovery in the film and OTT production business largely depends on the release schedules and contractual milestones of each project. Generally, payments are linked to key stages such as Pre production, Start of the Principal Photography, completion of Photography, Completion of Post production, client approval of content, and release timelines agreed with the client. Therefore, if there are any delays in project release due to production, post-production, or scheduling changes by the platform it may lead to a temporary delay in collections.

To manage this, the Company structures its invoicing on milestone achievements rather than only on final release dates, wherever possible. The Company also maintains close coordination with clients to track delivery and payment schedules and plans its project financing accordingly. With these measures, along with a strong and diversified project pipeline and long standing client relationships, the Company ensures steady cash flow even if there are variations in project release timelines. There are no receivables in FY 2025 or FY 2026 attributable to films or OTT series released in the

last quarter of the respective financial years. This is because, during both these periods, the Company's business model for films is based on a cost-plus-Margin structure with profit-sharing arrangements with the studio, after recovery of all expenses from revenue proceeds and sharing of intellectual property rights.

In the case of OTT series, the Company operates on a cost-plus-Margin model with OTT platforms. Accordingly, receivables arise from contractual billing and payment terms agreed with clients and are not linked to the release dates of the respective content.

If a company opts for section 115BAA of the Act, it shall pay corporate tax at a reduced rate of 22% (plus surcharge and education cess).

Section 115BAA of the Act further provides that domestic companies availing the said option will not be required to pay Minimum Alternate Tax ('MAT') on their 'book profits' under section 115JB of the Act and unutilized MAT credit, if any, will not be available for set-off. The option needs to be exercised on or before the due date of filing the tax return. Option once exercised, cannot be subsequently withdrawn for the same or any other assessment year.

The Company has evaluated and decided to opt for the lower corporate tax rate of 22 percent (plus applicable surcharge and cess) with effect from the Financial Year 2023-24 relevant to the Assessment Year 2024-25 under section 115BAA of the IT Act. Such option has been exercised by the Company while filing its return for the Financial Year 2023-24 relevant to the Assessment Year 2024-25 within the due date prescribed under sub-section (1) of section 139 of the Act. Since the Company has opted for lower corporate tax rate, MAT tax credit (if any) is no longer available for set-off or carry forward in future years.

B. Section 80M –Deduction in respect of Inter-Corporate Dividends

As per the provisions of Section 80M of the IT Act, dividend received by the Company from any other domestic company, or a foreign company shall be eligible for deduction while computing its total income for the relevant year. The amount of such deduction would be restricted to the amount of dividend distributed by the Company to its shareholders on or before one months prior to due date of filing of its Income-tax return for the relevant year.

C. Deductions from the Gross Total Income –Section 80JJAA of the Act –Deduction in respect of employment of new employees

Subject to the fulfilment of prescribed conditions, the Company is entitled to claim deduction under section 80JJAA of the Act with respect to an amount equal to 30% of additional employee cost (relating to specified category of employees) incurred in the course of business in the previous year, for three assessment years including the assessment year relevant to the previous year in which such employment is provided.

MACROECONOMIC OVERVIEW

Global growth is projected to remain resilient at 3.3 percent in 2026 and at 3.2 percent in 2027. The forecast marks a small upward revision for 2026 and no change for 2027 compared with that in the October 2025 World Economic Outlook (WEO). This steady performance on the surface results from the balancing of divergent forces. Headwinds from shifting trade policies are offset by tailwinds from surging investment related to technology, including artificial intelligence (AI), more so in North America and Asia than in other regions, as well as fiscal and monetary support, broadly accommodative financial conditions, and adaptability of the private sector

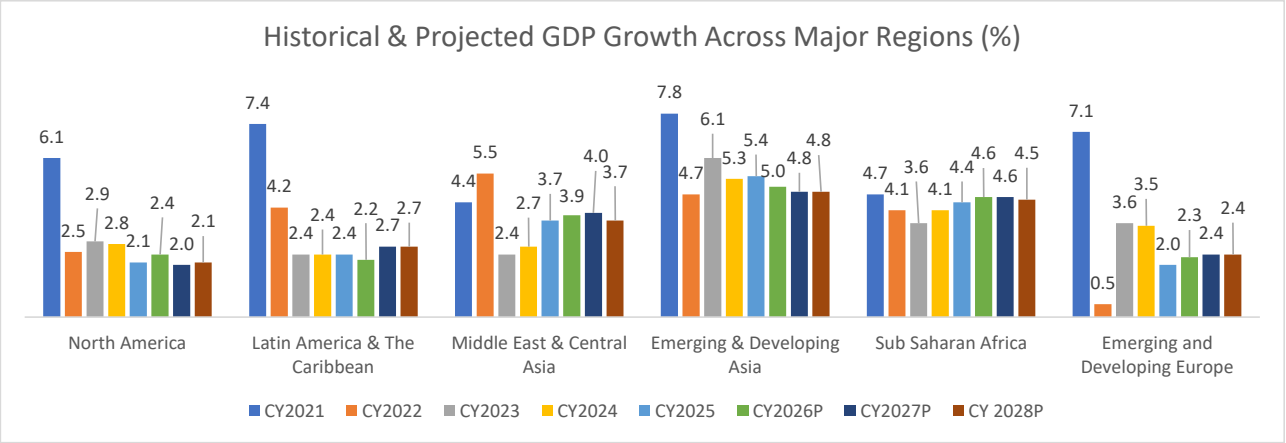
**Note CY 2028 projection is taken from October 2025(World Economic Outlook)*

Note: Advanced Economies and Emerging & Developing Economies are as per the classification of the World Economic Outlook (WEO). This classification is not based on strict criteria, economic or otherwise, and it has evolved over time. It comprises of 40 countries under the Advanced Economies including the G7 (the United States, Japan, Germany, France, Italy, the United Kingdom, and Canada) and selected countries from the Euro Zone (Germany, Italy, France etc.). The group of emerging market and developing economies (156) includes all those that are not classified as Advanced Economies (India, China, Brazil, Malaysia etc.)

Historical and Projected GDP Growth

GDP growth across major regions exhibited a mixed trend during 2024–25. While growth in several regions—including Emerging and Developing Asia as well as Latin America and the Caribbean—is expected to slow further in 2026, performance remains uneven across geographies. In Emerging and Developing Asia (comprising economies such as India, China, Indonesia, and Malaysia), GDP growth is projected to moderate to 5.4% in 2026, compared with 5.3% in the previous year. Similarly, in Latin America and the Caribbean, growth is expected to ease to 2.2% in 2026, before rebounding to 2.7% in 2027 as countries in the region approach potential output from differing cyclical positions.

The Global and India Macroeconomics section has been updated as of March 2026



Source-IMF World Economic Outlook January 2026 update.
**Note CY 2028 projection is taken from October 2025(World Economic Outlook)*

By contrast, growth in the Middle East and Central Asia is projected to accelerate, rising from 3.7% in 2025 to 3.9% in 2026 and further to 4.0% in 2027. This acceleration is supported by higher oil output, resilient domestic demand, and ongoing structural reforms. Likewise, growth in Sub-Saharan Africa is expected to strengthen, rising from 4.4% in 2025 to 4.6% in both 2026 and 2027. However, according to the IMF World Economic Outlook, growth is projected to moderate slightly to 4.5% in 2028, driven by ongoing macroeconomic stabilization and reform efforts in several key economies. Meanwhile, in Emerging and Developing Europe, the sharp slowdown to 2.0% in 2025 is expected to reverse, with the region's economies projected to expand at an average rate of 2.3% in 2026 and 2.4% in both 2027 and 2028. Across most regions, this recovery also reflects the diminishing effects of recent shifts in global trade policies.

Global Economic Outlook

Since the October 2025 World Economic Outlook (WEO), trade tensions have continued to abate, although they remain subject to occasional flare-ups. A dispute between China and the United States involving controls on exports of semiconductors and rare earth minerals was followed by a truce that reduced bilateral tariffs until November 2026 and introduced a pause on export controls.

In addition, US authorities removed tariffs on some agricultural products for all countries, offsetting the higher tariffs on certain sectors that were previously announced and are now in effect. As a result, the overall US effective tariff rate remains broadly unchanged from the level assumed in the October 2025 WEO although changes for specific countries are significant. The US Supreme Court is widely expected to deliver a decision in early 2026 regarding the president's use of the International Emergency Economic Powers Act. At the same time, newly signed bilateral trade and other agreements, often including substantial investment and purchase

commitments with limited public disclosure, have added further complexity. Although policy uncertainty has declined since October, it remains considerably higher than in January 2025.

Global growth in the third quarter of 2025 decelerated to 2.4 percent on an annualized basis, exceeding expectations; however, upside surprises in some countries were offset by downside surprises in others. In France, a boost from aerospace exports lifted growth to 2.2 percent, whereas in Germany, falling exports continued to weigh on activity, thereby leaving real GDP unchanged between the second and third quarters. Meanwhile, Japan's economy contracted by 2.3 percent, as private and government consumption partially offset the contraction driven by declines in private residential investment and exports. At the same time, China's growth decelerated to 2.4 percent (according to staff estimates), with weak domestic demand—particularly in the housing sector—only partly offset by resilient exports.

In contrast, growth in the United States accelerated to 4.3 percent, supported by a pickup in technology investment and expenditure, which is estimated to have added approximately 0.3 percentage point to average annualized GDP growth during the first three quarters of 2025, thereby offsetting the drag from the federal government shutdown in the final quarter of the year. In addition, there are indications that technology-related investment also contributed to economic activity in Spain and the United Kingdom, although the scale of this contribution was smaller than that observed in the United States.

Global Growth Projection

At broader level, the global growth is expected to remain steady, as momentum in high-tech sectors is projected to slow but continue to partly offset the drag elsewhere. While tariffs and elevated uncertainty are expected to weigh on the level of activity, their impact on growth is projected to fade during 2026,2027 and 2028. At 3.3 percent in 2026 and 3.2 percent in 2027 and 2028, global growth is therefore expected to decelerate slightly from the estimated 3.3 percent recorded in 2025. Compared with the October 2025 World Economic Outlook (WEO), the forecast for 2026 has been revised upward by 0.2 percentage point, whereas the forecast for 2027 remains unchanged. Nevertheless, there are significant revisions for some countries, with changes occurring in different directions.

Growth in advanced economies is projected at 1.8 percent in 2026 and 1.7 percent in 2027 and 2028. In the United States, economic activity is expected to expand by 2.4 percent in 2026, supported by fiscal policy and a lower policy rate, while the impact of higher trade barriers gradually wanes. This 0.3 percentage point upward revision relative to October reflects a stronger-than-expected GDP outturn in the third quarter of 2025, a rebound in activity in the first quarter of 2026 compared with the fourth quarter of 2025 following the end of the federal government shutdown, and the associated carryover effects. Looking ahead, growth in the United States is projected to remain solid at 2.0 percent in 2027, supported by a near-term fiscal boost from tax incentives for corporate investment under the One Big Beautiful Bill Act of 2025. Although technology-driven momentum is expected to moderate, it is still projected to provide a partial offset to lower immigration and moderating consumption.

In the euro area, growth is expected to remain steady at 1.3 percent in 2026 and to increase modestly to 1.4 percent in 2027. The slightly faster growth in 2027 reflects projected increases in public spending, particularly in Germany, alongside continued strong performance in Ireland and Spain. Overall, the forecast remains broadly unchanged from October, with the subdued growth outlook reflecting unresolved structural headwinds. The impact of the planned increase in defense spending is expected to materialize only in subsequent years, as commitments to reach target levels are phased in gradually through 2035. Compared with other regions, the euro area benefits less from the recent technology-driven investment boost. In addition, the lingering effects of persistently higher energy prices following Russia's invasion of Ukraine are expected to continue weighing on manufacturing, with additional pressure stemming from the real appreciation of the euro relative to the currencies of countries exporting similar products. In Japan, growth is projected to moderate from 1.1 percent in 2025 to 0.7 percent in 2026 and to 0.6 percent in 2027 and 2028. This marks a small upward revision relative to the October figure, reflecting in part the fiscal stimulus package announced by the new government.

In emerging market and developing economies, growth is projected to hover just above 4.0 percent in 2026, 2027, and 2028. Relative to the October forecast, China's growth in 2025 has been revised upward by 0.2 percentage point to 5.0 percent, reflecting the implementation of stimulus measures and additional policy bank

lending for investment. Growth in China for 2026 has also been revised upward by 0.3 percentage point to 4.5 percent, as a result of lower effective US tariff rates on Chinese goods following the yearlong trade truce agreed in November, alongside stimulus measures assumed to be implemented over a two-year period. However, the economy's growth rate is expected to decelerate to 4.0 percent in 2027, as structural headwinds increasingly weigh on activity.

INDIAN MACROECONOMIC OVERVIEW

The International Monetary Fund (IMF) has revised upward India's economic growth for 2025 by 0.7 percentage point to 7.3%. In its World Economic Outlook update, the IMF stated that the upward revision reflects strong growth momentum in the fourth quarter of the current fiscal year. At the same time, the IMF projects India's growth at 6.4 percent in the CY 2026, noting that despite the expected moderation, India is expected to remain a key driver of growth among emerging market and developing economies. In addition, the IMF expects inflation in India to return to near-target levels following a marked decline in 2025, driven by subdued food prices, which is expected to provide further support to domestic demand. However, the IMF cautioned that AI-driven productivity gains could lead to a pullback in investment and tighter global financial conditions, with spillover effects for emerging economies.

Note CY 2028 projection is taken from October 2025(World Economic Outlook)

[2] For India, data and projections are presented on a fiscal year (FY) basis, with FY 2024/25 (starting in April 2024) shown in the 2024 column. India's growth projections are 6.4 percent for 2026, 6.4 percent for 2027 and 6.5% for 2028 based on calendar year

Growth Outlook

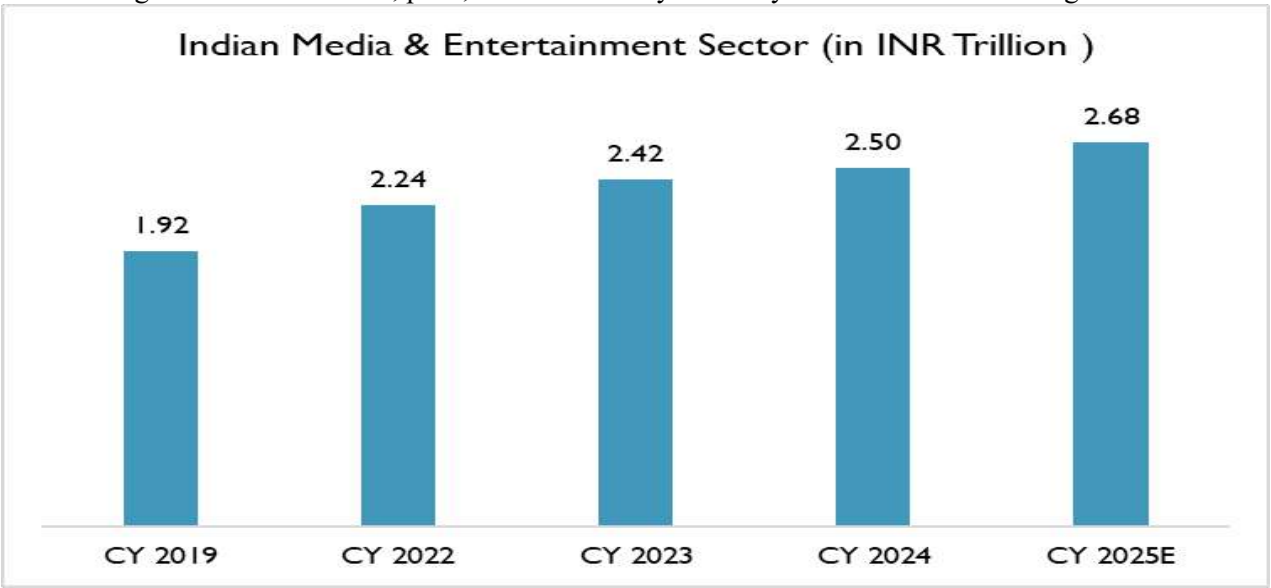
The Union Budget 2026–27 sets out a quantitatively strong push to build resilient supply chains and develop next-generation industrial capacity. The record ₹12.2 trillion capital expenditure outlay aims to ease logistics bottlenecks and enhance India's cost competitiveness. Employment measures extend across both urban and rural India in one sweep. In cities and large towns, capex is channelled into "connectors" such as the seven proposed high-speed rail corridors and upgraded Tier-2 and Tier-3 infrastructure, creating construction, logistics, and service jobs while cutting commute times. In smaller towns and villages, jobs are expected to grow through mega textile parks, the Mahatma Gandhi Gram Swaraj Initiative's push for khadi and handloom, training for tourist guides, and new waterways and coastal shipping. Together, these steps broaden the wage base instead of providing a short-term bump.

Strategic supply chains receive an important push. Dedicated rare earth corridors in Odisha, Kerala, Andhra Pradesh, and Tamil Nadu; customs exemptions for capital goods used in critical mineral processing and battery cells; and the India Semiconductor Mission 2.0 aim to pull manufacturing deeper into components and materials. If executed well, these measures reduce import dependence in magnets, batteries, and chip inputs and lift the share of higher-productivity manufacturing jobs — raising household incomes durably.

Indian Media & Entertainment Industry

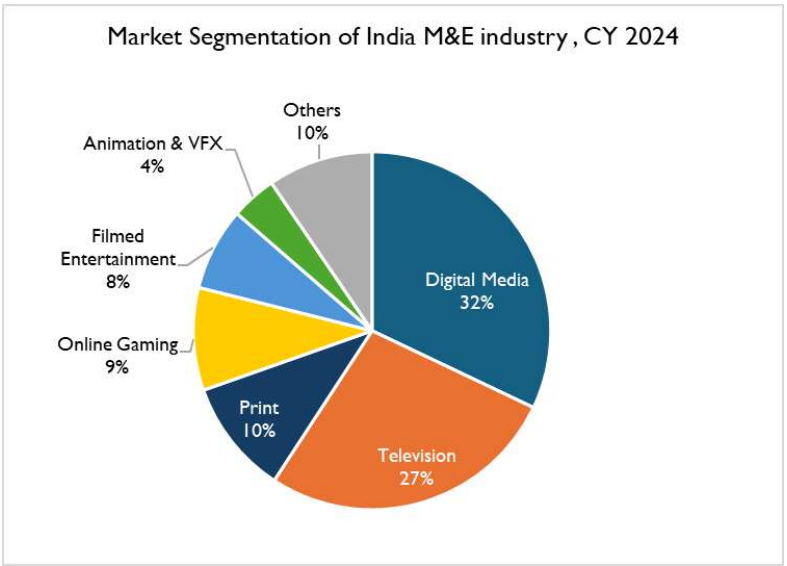
Estimated Market Size of Media & Entertainment Industry

Indian media and entertainment (M&E) sector demonstrated substantial growth, with an annual increase of INR80 billion. This growth brought the industry size to INR 2.50 trillion, reflecting an 3.3% rise. Between CY 2019 and CY 2025, the sector has expanded at a compound annual growth rate (CAGR) of approximately 5.7%, rising from INR 1.92 trillion to a projected INR 2.68 trillion, surpassing pre-pandemic levels. However, traditional segments like television, print, and radio have yet to fully recover to their 2019 figures.



Key Segment Analysis

Source: FICCI & EY Media & Entertainment report, D&B Estimates



While television has reached the second largest segment position, digital media has surpassed it in CY 2024 with 32% market share. The overall M&E sector is expected to grow at a rate of 7.2%, increasing from INR 2.50 trillion in CY 2024 to INR 2.68 trillion in CY 2025, and further expand to INR 3.06 trillion by CY 2027 at the same growth rate. A key contributor to this expansion is the rising demand for visual effects (VFX), driven by the increasing popularity of Indian films, television shows, and web series. VFX has become an integral component for filmmakers aiming to create visually compelling content, reshaping the industry's landscape. This growth signals significant opportunities for India in the global VFX market. With rapid digital transformation, fuelled by a growing number of internet users and affordable smartphones, India is well-positioned to emerge as a major player in VFX.

The share of new media, including digital platforms and online gaming, grew from 20% in 2019 to 41.3% in 2024. Conversely, traditional media segments such as television, radio, print, and cinema saw their combined share decline from 76% to 46% during the same period. Segments like online gaming, filmed entertainment, live events, and out-of-home media also experienced robust growth, collectively contributing 30% to the sector's overall expansion.

Consumer preferences have shifted toward on-demand and personalized content through streaming platforms, which has driven increased demand for VFX. This shift has resulted in more original content being commissioned, with Indian studios gaining global recognition. International production houses are increasingly outsourcing VFX work to India due to its cost-effectiveness and high-quality services, presenting an opportunity for the country to capture a larger share of the global VFX market.

Despite challenges such as piracy, low broadband penetration in rural areas, and rising competition from digital platforms, the Indian broadcasting and entertainment sector is expected to continue its expansion. With growing demand for high-quality visual content, technological advancements, and a supportive market environment, India is on a path to becoming a key player in the global VFX industry.

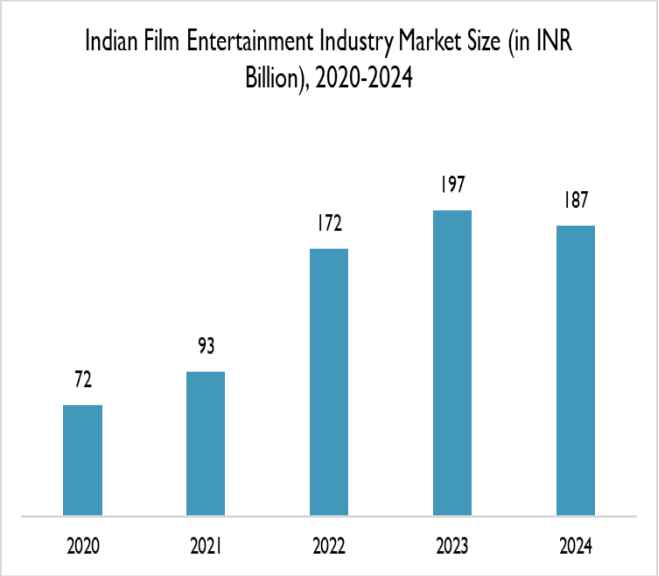
Current Market Scenario

Historical Growth Trend

The Indian film entertainment industry has experienced a remarkable surge in recent years, fuelled by a confluence of factors. Increased production, coupled with box office successes and evolving audience preferences, have propelled the industry's market size to a substantial INR 187 billion in 2024 from INR 72 billion in 2020. This impressive growth trajectory, reflecting a CAGR of approximately 27%, underscores the industry's robust health and its potential for continued expansion.

Source: FICCI & EY estimates



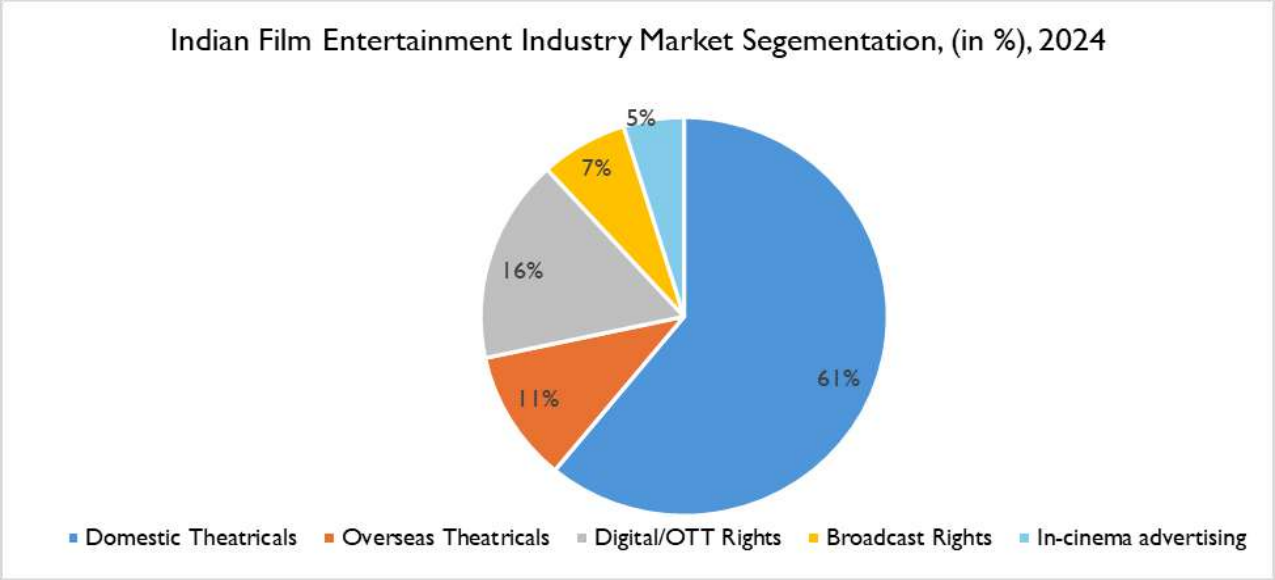
The growth has been fuelled by several key trends. The number of films released in theatres has steadily increased, reaching a new high of 1,823 films in 2024. While screen count has grown modestly with multiplex chains adding approximately 185 screens annually, it remains relatively low compared to the population, indicating that the cinema experience remains a luxury for most Indians. A slight decline was observed in the domestic theatrical market achieved a milestone, crossing the INR 187 billion, primarily due to an increase in ticket prices.

The industry's global reach has also expanded, with Indian films being released in more countries than ever before. The digital landscape has witnessed a shift, with streaming platforms becoming more selective in acquiring direct-to-digital rights, emphasizing the importance of theatrical performance. Broadcast rights have remained soft, reflecting challenges faced by film channels. However, in-cinema advertising has shown a strong recovery, indicating growing advertiser interest in reaching cinema audiences.

Overall, the Indian film entertainment industry is in a strong position, driven by a combination of factors, including increased production, box office success, global reach, and technological advancements. As the industry continues to evolve, it is poised to play an even more significant role in the global film landscape.

Market Segmentation

The Indian film entertainment industry is segmented into various revenue streams, with domestic theatricals, digital/OTT rights, overseas theatricals, broadcast rights, and in-cinema advertising accounting for most of the market share. In 2024, domestic theatricals dominated the market, contributing 61% of the total revenue, totalling INR 114 billion. This reflects the continued popularity of cinema experiences among Indian audiences.



Key Challenges & Risks associated with film Production and Distribution

The Indian film industry is one of the largest in the world, producing a vast number of films annually across multiple languages. However, the production and distribution of films in this dynamic market face several key challenges and risks, which can impact profitability, audience reach, and the long-term success of projects.

Production Challenges

- **Rising Production Costs:** The cost of producing films, especially with increasing demand for high-quality content involving advanced VFX, top-tier talent, and premium locations, is escalating rapidly. This is particularly challenging for mid-budget films that need to compete with big-budget blockbusters. High production budgets raise the stakes for profitability, as the financial burden increases in cases where films fail to recover costs at the box office.
- **Talent Management and Scheduling:** Coordinating actors, directors, and technical staff can be complex, especially for larger films. A-list actors and directors often juggle multiple projects, making it challenging to synchronize schedules, which can lead to project delays and budget overruns.
- **Technological Adaptation:** The rapid evolution of filmmaking technology, including advanced visual effects (VFX) and 3D filming, requires constant updates in equipment and training. Smaller production houses struggle to adapt to these technologies, leading to disparities in production quality.
- **Piracy:** One of the most significant risks in Indian cinema is piracy. Films are often leaked online soon after their release, leading to a massive loss in box office revenue. Despite legal efforts, piracy remains rampant, undermining the profitability of films.

Distribution Challenges

- **Limited Screen Availability**: India has fewer than 10,000 cinema screens to cater to a population of over 1.4 billion, with the largest deficit in Hindi-speaking markets. This creates intense competition among filmmakers for prime slots in cinemas, particularly for big releases that require a wide distribution to recoup costs quickly.
- **Declining Pay-Tv Homes**: Pay-Tv homes have been decreasing in India as more viewers shift to OTT platforms. This trend poses a risk to traditional film distribution models, which heavily rely on television broadcast deals for additional revenue. Declining television audiences mean reduced pay-tv revenue streams, affecting profitability.
- **Regional vs. National Distribution**: India's diverse linguistic landscape presents both an opportunity and a challenge. Reaching audiences across different states requires tailored distribution strategies. Films that are successful in one region may struggle to gain traction in another, limiting the potential reach of films that do not cater to pan-India audiences.

- **High Dependence on Theatrical Revenues**: Despite the rise of digital platforms, theatrical releases continue to be the primary source of revenue for films. The risk here is that films often have a very short window to succeed at the box office before being replaced by new releases, putting immense pressure on marketing and opening-weekend performance.
- **International Distribution Hurdles:** Indian films, particularly regional films, often face challenges in gaining international distribution. Even though the demand for Indian content is growing globally, logistical issues, censorship, and differing content regulations in various countries make international distribution a complex and costly process.

Financial and Regulatory Risks

- **Unpredictable Box Office Returns:** The film industry is highly unpredictable. Even well-marketed films with star-studded casts can fail at the box office due to a range of factors including competition from other films, changing audience preferences, or even external factors like weather or political events.
- **Censorship and Regulatory Restrictions:** The Central Board of Film Certification (CBFC) and other regulatory bodies impose strict guidelines on film content. Filmmakers often face challenges in obtaining approvals, particularly for films that tackle controversial or sensitive subjects. Delays in certification can push back release dates, adding to costs and missed opportunities.
- **Complex Revenue Sharing Models:** Revenue sharing between producers, distributors, and exhibitors can be complicated, especially with multi-platform releases (theatrical, television, OTT). The negotiation of favourable terms is crucial, and small production houses may struggle to secure good deals compared to larger studios.
- **Competition from OTT Platforms**: OTT platforms are both an opportunity and a challenge for traditional film distribution. While they provide additional revenue streams, they also change audience consumption habits, with many viewers preferring digital releases over cinema-going experiences. This shift affects the box office performance of films, especially for smaller productions.

Growth Forecast

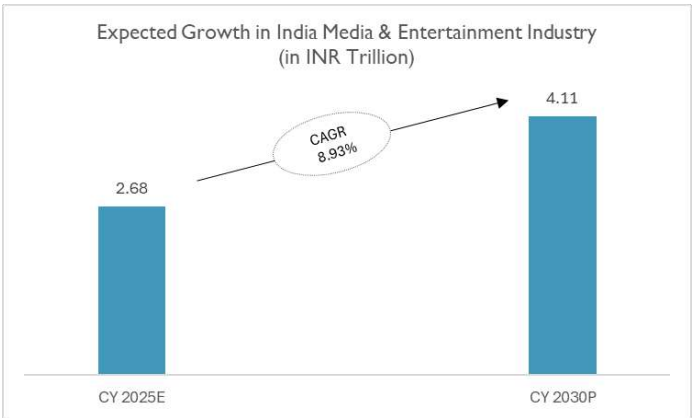
Digital media is expected to grow at a CAGR of 11.2%, significantly showing a better growth rate compared to other segments. Animation and VFX, live events and Music segments are also expected to witness substantial growth, driven by the increased use of technology, effective spends by public and private events such as concerts, big weddings innovation in content production and independent artists gaining popularity.



Source: D&B Estimates and Projections

By the beginning of 2025, digital media has already surpassed television in terms of overall revenue, making it the dominant segment in the Indian M&E landscape. The rapid adoption of OTT platforms, online gaming, and digital advertising will drive this growth. OTT platforms are experiencing rapid growth due to increased mobile usage, affordable data, and regional content offerings. By 2027, digital subscription revenues are expected to grow by over 13%, further solidifying digital media's role as the industry leader.

Localization and regional content are emerging as crucial growth drivers. Regional OTT content exceeded Hindi language

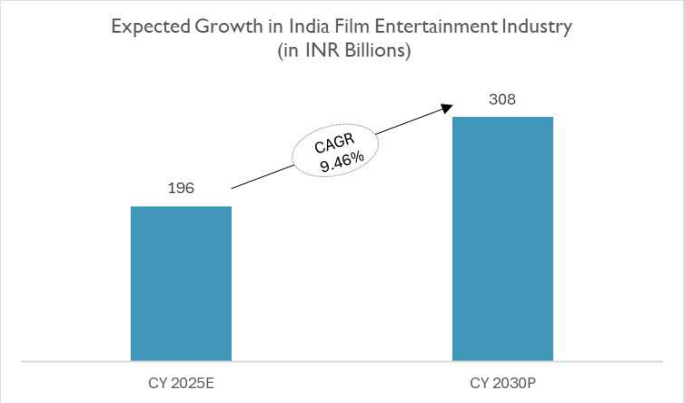
content for the first time in 2023, and this trend is expected to continue as platforms invest in diverse regional languages . Ad-supported models (AVOD) and subscription-based models (SVOD) are expected to evolve further, with innovations in pricing, bundling, and content monetization. India's OTT sector is likely to adopt multi-layered pricing models to capture a wider audience, especially in regional markets. The industry is also embracing immersive technologies such as virtual reality (VR) and augmented reality (AR), which are expected to enhance audience engagement in the coming years.

Expected growth in film entertainment segment and Insights on emerging growth pattern

The film entertainment segment is expected to grow at a CAGR of 4.4%, reaching INR 213 billion by 2027, up from INR 187 billion in 2024. Theatrical revenues are likely to remain strong, with an increasing number of screen installations, especially in Tier II and III cities, driving growth. High-end multiplexes offering premium experiences will cater to affluent audiences, while affordable cinemas will target the middle-class audience. Digital rights and streaming deals with OTT platforms are becoming a major revenue stream for the film industry. With many films opting for direct-to-digital releases, OTT platforms will continue to support the growth of the film segment by acquiring digital rights.

Emerging Growth Patterns

- Expansion into Tier II and III Markets: Tier II and III cities are emerging as significant growth drivers for the film industry. These cities are witnessing the construction of new screens and multiplexes, addressing the long-standing shortage of cinema screens. This expansion will increase the consumption of films in regional markets.



Source: D&B Estimates and Projections

- India's cinema industry faced yet another addition in number of screens in key areas especially in the Northern region of the country. In addition to this the largest Multiplex player has planned to add around 100 more screens in FY 25. South India continues to lead, holding 47% of the nation's screens, contributing 5,169 out of the total, while the rest of India accounted for 4,573 screens. Despite this growth, the country still struggles with a significant shortage of screens, particularly in Hindi-speaking markets, where the deficit is most pronounced.

- In 2024, 60 million lesser Indians visited cinema halls, reflecting the challenges of accessibility and reach for a broader audience. However, the industry's resilience was evident, with 1,823 films released in theatres, an 2% increase over the previous year. This small growth in theatrical releases is a point to ponder and address the need to attract the viewers to the screens

- Focus on Regional Cinema: Regional cinema is gaining momentum, with a growing demand for films produced in languages such as Tamil, Telugu, Kannada, and Marathi. This shift is reflected in the rising share of regional content on both OTT platforms and in cinemas. Regional films that resonate with local audiences and have universal appeal are increasingly crossing borders, gaining viewership across states and internationally.

- Digital First Releases: The pandemic has accelerated the trend of direct-to-digital releases, where films debut on OTT platforms rather than in theatres. This trend is expected to continue, especially for mid-budget films, reducing the financial risk associated with theatrical releases and providing a global audience.

- Premium Cinematic Experiences: The growing demand for premium cinematic experiences (such as IMAX, 3D, and luxury seating) is shaping the future of high-end cinemas. This market segment targets affluent audiences who are willing to pay for enhanced viewing experiences.

- Rise of Animation and VFX: The demand for high-quality VFX and animated films is growing, especially in genres like fantasy, sci-fi, and action. India is becoming a hub for VFX services, not just for domestic productions but also for international markets. Films with heavy VFX elements are gaining traction among audiences, especially in multiplexes, providing an opportunity for producers to experiment with new technologies.

In summary, the Indian M&E industry and film entertainment segment are both set for strong growth, driven by digital transformation, regional content, and the expansion of theatrical and OTT markets. These growth patterns indicate that the industry is moving towards greater diversification, regionalization, and technological integration, ensuring sustained growth in the coming years

Indian Television segment

Overview

India is one of the largest markets in the television segments in the world. The industry is set to be growing owing to the increased demand for connected TV and digital content available on demand. The growth in the TV market began with the free to air channels by Prasar Bharati passed as an act by the parliament in 1990. It is still the largest network reaching approximately 98% of India providing content such as News, entertainment, and few sectoral programmes. Today India has about 230 million TV households with an option of choosing over 908 channels including free and paid ones.

The segment had yet another breakthrough with the evolution of paid channels with few private channels majorly Hindi targeting few major cities in India. The number of private channels increased exponentially over the period which also introduced two Tv households. This was fuelled by the more affordable and technological developments such as LCD and LED displays.

Parallelly, there grew a large network of local cable operators. In the late 90s the concept of Direct to Home was proposed, however it face approvals thus allowing it to rise in 2003. The concept was even adopted by Prasar Bharathi the then and now the largest public broadcasting network taking the DTH to part of the country which did not have Cable network access. The technology has thus evolved till date staying latest and relevant with providing advanced features of HDR and 4K resolution. These features made the consumer have better view and enjoy the theatre like experience.

Key **segments**

Free to air: The facility to watch a channel without having to pay a subscription charge on a periodic basis is the free to air facility. This has been primarily issued by Prasar Bharati, the statutory autonomous body by act of Parliament of India. Until today there are about 360 free channels of which majority of them are broadcasted by the former. The rest include channels pertaining to news, music, and religious sector.

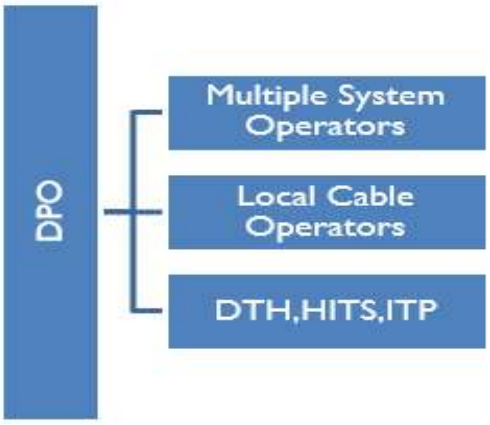
Cable TV segment: The broadcasting of content on channels to customers through a paid subscription is how cable tv segment works. This market is filled with network of enormous number of local cable operators along with key DTH players such as DD Free Dish, Tata play, Airtel DTH, Sun Direct etc. The cable network usually offers a bundle of free and paid channels as per the consumer's choice. Recent technologies such as FTTH and multicast technology are helping these operators survive the competition with advantage of higher internet connectivity especially for work, connected TVs and online gaming. In the past 5 years the growth of the segment is hindered by the increased demand for video content on demand. The Local cable networks are impacted with the harsh reality of the competition. The pay TV in other words has lost significantly since 2018 i.e., from 151 million to 111 million in 2024.

Key Stakeholders

Broadcasters: The broadcasting scenario in India rapidly changed with the emergence of Cable TV and Direct to Home services. There are two types of Broadcasting system i.e., Public, and private. The Prasar Bharati is still the largest and the public broadcaster of India. It enjoys monopoly over broadcasting (TV channels) in the Terrestrial mode. On the other hand, the private broadcasting setup includes a package of few free to air channels and paid channels viewers pay to receive private-owned TV channels transmitted in the Cable and Satellite mode.

Distribution Platform Operator: The distribution platform operators system is quite linear with MSO, LCO and other players such as DTH, HITS, ITP etc They help distribute the content produced to viewers or consumers through various modes.

Multiple System Operators (MSO): Multiple System Operators providing TV content through cable operators and other services such as Broadband, Telecom etc. These players have greater presence in the market with benefits having a basic physical infrastructure helping them diversify their service offerings. As of March 2025, there are 850 MSO registered with MIBin India. These are the players who are registered with MIB to provide Cable TV sector. Of these 850, 11 have a subscriber base of more than a million. MSOs have been facing stringent regulations from MIB, and non-compliance have resulted in the cancellation of licenses of about 1200 of them. MSOs function independently and through Joint ventures essential for functioning. Recently observed trend indicates MSOs tying up with viewership rating and advertising agencies as they help understand the end users.



Local Cable Operators (LCO): Local Cable Operators – These include individual persons or business who provide Cable TV an Internet connectivity usually catering to a specific region. Often related to as the last mile in providing Broadcasting services, connect Multi system Operators and the viewers. The network of LCO's has been quite extensive and have better reach, personalized interaction with customers and are also being affected the most in the changing industry. The boom of the cable operators began in 1990s with the emergence of private channels. This resulted in the enormous number of subscribers to the cable network. The industry steadily grew till mid-2000s.However with the entry of DTH offering better quality picture and audio quality, the cable operators experienced a little competition. The DTH and later the Connected TV trend impacted the Cable operator's business.

Growth Trend in TV households in India

Television in India in the early 70s was a luxury to everyone and currently almost every middle-class household has it and sometimes even more than one. Indian television has grown from two channels till 1992 to 918 channels registered with Ministry of Information and Broadcasting Government of India as on March 2025.The number of TV households has increased over the years to approximately 230 million Tv sets till date. With the advent of the regulatory regime in 2004, the technology and ecosystem evolved from analogue in 2004 to the digital mode by March 2017. The growth has been about 2.23% since 2018 owing to numerous factors such as increase in OTT content, affordable smartphones, and Internet connectivity across the country. The growth of connected TV or Smart TVs are keeping the growth steady.

The graphical representation of total households based on the connections and the type of distribution of TV segments has shown considerable increase. The pay TV segment has been experiencing a slight decrease in the connection owing to the COVID Scenario, popularity of OTT segment addressing the video on demand and accessibility of content on the various platforms such as laptop, smartphones etc. This also supports the increase in the Connected TV connections owing to vast availability of content of various OTT platforms, tele shows and other platforms such as YouTube .The growth in the TV segment though looks to be slightly discouraging with respect to the pay TV connections is expected to be boosted by Connected TV segment. The Free TV connections is a game changing factor in the rural market which is majorly dominated by DD Prasar Bharati and few private channels.

Insight on Revenue Model

Major sources of TV revenue are advertising, subscription, and licensing majorly. The revenue sources in Indian TV industry varies a little including other sources such as Product Placement, Sponsorship, Re-transmission fees. However, the major means of revenue generation in India is Advertising and Subscription.

The advertising stream for TV had been one of the highest for creating revenue till date since the emergence of cable TV. However in the last few years i,e from 2022 there has been a diminishing trend in the TV ad volume , thus the revenues largely owing to the shift in the viewership from TV to other digital media .Targeted, data oriented and affordable ads over OTT, Social Media Platforms are also driving away the TV ad volume. Though the traditional TV ad revenues are looking quite dull, some of the connected TV manufacturers such as Roku and Samsung are integrated advanced features such as innovative Operating systems and personalized content experiences to make them more likable for TV ads.

Distribution model of TV connections

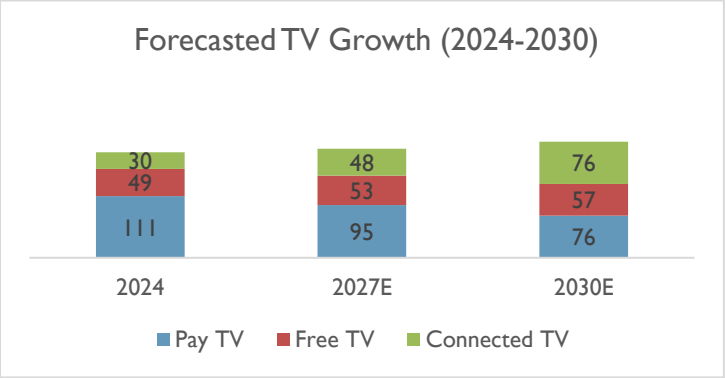
Subscription Model: The subscription in large volumes of Pay TV, Connected TV and others mainly contribute directly to the revenue. The subscription revenues which were mostly TV viewers have now transitioned to the connected and digital media i.e., OTT platforms. The subscription of the Pay TV seems to have been experiencing a declining trend owing to increase in switch to free TV and varied content broadcasted on connected TV and increased Internet subscriptions. The various subscription models currently attracting revenue are SVOD and PVOD. There are other models such as AVOD, TVOD which currently not as trending and sought after compared to the former.

Subscription Video on Demand (SVoD) are online TV services for which consumers pay a monthly or annual charge to view content without ads, such as Netflix and Amazon Prime Video. Advertising-supported Video on Demand (AVoD) and free ad-supported streaming television (FAST) include free online TV services, such as MX Player, Airtel TV, and JioCinema. Hybrid subscription/ ad-funded products are online TV services for which consumers pay a lower monthly or annual charge due to the presence of adverts on the service, such as Disney+ Hotstar, Zee5, and SonyLIV's ad-supported plans.

There has been a new subscription based Tv service product called "DOR" which offers a TV with access to OTT platforms which comes with Smart TV and subscription service of OTT platforms. This is an affordable product service bundle which could change the connected TV sector while also supporting the increasing subscriptions of OTT platforms.

The cable TV sector is currently experiencing a lot of predicaments owing to the regulatory woes, technological changes and from unregulated digital platforms. This has impacted the segment economically and socially and every stakeholder including network engineers, backend service providers and customer support. It has evolved while offering Cable TV and sometimes broadband as well. Some of the Local Cable Operators have transitioned into Multi system operator to survive the competition of DTH and Internet service providers. Den and Hathway are some of the entities which evolved into MSOs and currently have more than one million subscriber bases in India. The segment experienced at least 40 million households from 2018 to 2024. It is expected to continue losing much more subscriptions or households owing to increased competition from other TV segments.

Growth Prospects



Sources: FICCI & EY Report

The growth of the TV segment is expected to progress little slower compared to the other Media segments owing to rapid rise in OTT subscriptions and the variety of content made available at a single platform. The Pay TV segment is looking at a declining rate of 6% given the opportunity of Free TV by key players in the market and increase in purchases of connected TV powered by various internet service providers. However, the Free TV which is one of the key entertainment sources for rural and remote areas and with the lower strata of the society is expected to reach 57 million connections by 2030.The government initiatives to provide Free Dish even across remote area could be fuelling this increase. The Connected TV segment on the other hand, is set to be the fastest growing segment in the TV market for the following reasons:

- Affordability of Internet across the country and given reduction in the data prices.
- Most of the TV sets sold are now internet enabled thus allowing integration of various OTT platforms made available on the TV sets. This even helps the marketers to measure the viewership of the OTT platforms and other key indicators of usage of the OTT platforms.
- Better quality content being produced and aired on web series, short films, regional content of various forms on these platforms. Also, these forums provide tele shows and programmes aired on Pay TV as well.

- Release of movies exclusively on OTT platforms made available are another attractive factor for increase in subscriptions of Connected TVs.

TV Dark opportunities: There are more than 100 million TV dark homes as per TRAI. The opportunities such as free to Air, better electrification across the rural areas is set to improve the growth of TV segment which are yet to buy TV. There could be reforms by introducing and making free to air dish more affordable with combining TV sets.

More Regional content produced for TV: India produces about 2000000 hours of content and most of the content i.e. 97 % is for TV. There is more regional content broadcasted through TV than any other platform. Though there is a shift in urban TV households to shift to OTT, regional language shows are much more preferrable in Rural areas where traditional TV has a strong foothold.

Connected TV growth: The affordable cost of connected TVs, enormous number of households with non-smart TVs are major reasons for the increase in the growth or purchases of connected TVs. Availability of free platforms such as YouTube on these connected TVs, is another motivating factor. It is one of the means for advertisers to reach viewers and to measure the data related to the watch time. This will help advertisers target ads on the OTT and other digital media platforms.

Technological Advancements: As technology is changing rapidly in various industries, the same is being observed in TV manufacturing. Manufacturers are in a competition to get the latest tech specification such as AI powered personalized control, voice control, enhanced picture, and sound quality. The enhanced picture clarity has been innovated in QLED, OLED, QLED 8K, Neo QLED 4K TVs. Faster processers and other key components are incorporated to make seamless and quick functioning.

Affordability of TV sets: Increasing disposable incomes are making households able to afford amenities such as TV. With the reduction in inflation and consumer price Index which was even less than the 2014 value. According to the Rural Economic Conditions and Sentiments Survey (RECSS), released by NABARD, 77% of the rural households reported increased in consumption and amongst these households about 40% of them also opinionated about having increased income. In addition to these results, the e commerce segment has been offering discounts on various occasions to encourage purchase of electronics and gadgets. The same measures are also being adopted by financing institutions.

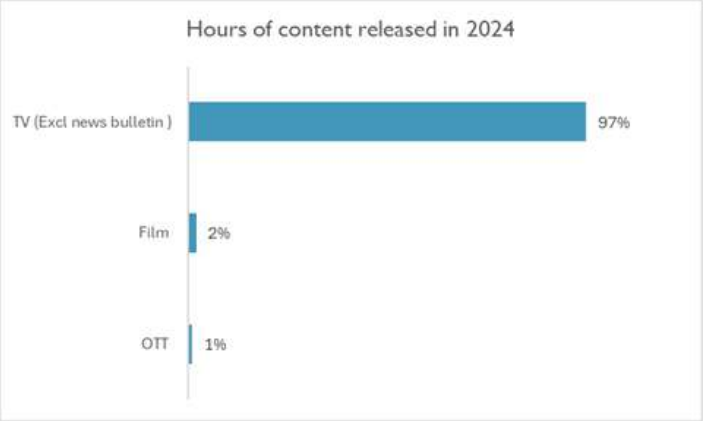
OTT Platforms in India

Mapping the Indian OTT landscape

The Indian Over-The-Top (OTT) landscape is rapidly evolving, characterized by a diverse range of platforms and a significant shift towards regional content. There was also an increase in the number of movies released on the platform compared to 2023.The OTT landscape includes major players like Netflix, Amazon Prime Video, JioStar, and regional platforms such as Hoichoi and Manorama Max. These platforms cater to a vast audience by offering content in various languages including Hindi, Tamil, Telugu, Bengali, and more. The demand for vernacular content is particularly strong, with studies indicating that around 30% of Indian consumers prefer content in their native languages. To support this about 48% of content released in 2024 by these major players were in regional languages.

In 2024, the digital media landscape in India is witnessing unprecedented growth, with OTT platforms emerging as a dominant force in the Media & Entertainment (M&E) sector. Poised to potentially surpass television, digital media is driving the industry's expansion at a projected annual growth rate of 10%, with the market expected to exceed INR 3 trillion (USD 37.1 billion) by 2026. This surge is fuelled by widespread internet accessibility, growing smartphone penetration, affordable data, and a significant increase in online content consumption. Despite the digital boom, traditional media remains resilient, positioning India as a "Linear and Digital Market," highlighting the coexistence of both digital and traditional media in the country’s diverse and evolving media ecosystem.

India produces approximately 200,000 hours of content annually, including over 4048 hours of film content and 2620 hours of premium OTT content. Digital media is poised to surpass television in revenue by 2024, driven by its 52% share of total advertising revenue in 2023 and the steady rise in digital subscriptions. The demand for premium OTT content is expected to grow from 3,000 hours in 2023 to 4,000 hours by 2026, Video OTT is expected to grow from 43 million households in 2023 to 65 million in 2026, fuelled by smartphone penetration, affordable data, and the shift to on-demand streaming. Increasing investments in original productions and the rising appeal of regional content highlight the vast opportunities in India’s thriving digital entertainment sector.



Source: FICCI & EY Media & Entertainment report

North India has emerged as a significant segment within the OTT market, with platforms tailoring content to local preferences. This trend is mirrored in other regions where there is a growing emphasis on producing original series and films in regional languages. The rise of regional OTT players highlights the importance of localized content in engaging audiences who primarily consume media in their mother tongues.

In addition, a set of lower-priced "cinema products" will emerge for the next 100 to 150 million audiences across the top 50 to 75 cities of India, which will also require a change to the type of content being produced for these audiences, and which could even see regional OTT products releasing in a windowed manner.

Key Players in the Indian OTT Market

- Indian Platforms: Prominent local OTT platforms include Hotstar, Zee5, SonyLIV, Jiostar Voot, and MX Player. These platforms cater to regional language content and often provide competitive pricing for local audiences.
- Global Players: International OTT giants like Netflix, Amazon Prime Video, Hulu, Paramount, Apple TV+, and Peacock have also made significant inroads into the Indian market, creating content in local languages and pricing their services strategically to gain market share.

Subscription Models

- Subscription-based Video-on-Demand (SVOD): Platforms such as Netflix and Amazon Prime Video rely on subscriptions. India's low-cost model, with platforms like Amazon Prime's yearly subscription of INR 999 or Netflix's mobile plan at INR 199 per month, has been pivotal in driving subscriber numbers.
- Ad-supported Video-on-Demand (AVOD): Platforms like MX Player and Voot allow users free access to content with advertisements, making it accessible to a larger audience who may not be willing to pay subscription fees.
- Freemium Models: Some platforms like SonyLIV offer a mix of free content with ads and premium ad-free subscription options.

Emerging Trends in OTT Space

Hybrid streaming models (SVOD & AVOD models) catering to distinct set of audiences

The OTT industry is witnessing a strategic convergence towards monetised models, with platforms increasing adoption to hybrid formats that combine both SVOD (Subscription Video on Demand) and AVOD (Advertising Video on Demand). The shift highlights changing consumer behaviour towards value driven content without committing to high subscription costs. As a result, several global and regional OTT platforms are offering tiered plans, allowing users to access selected ad-supported content at affordable prices or even for free, while reserving premium ad-free content for paid subscribers. There are currently about 57 such OTT platforms operating in India, according to the MIB portal out of which about 52 (91%) of the total OTT platforms offering both SVOD and AVOD options to subscribers. Individual growth of the Indian AVOD segment is anticipated to reach US$ 2.6 billion by FY25 end rising at a CAGR of 24%, while

the Indian entertainment sector could unlock an estimated Rs. 50,724 crore (US$ 6 billion) in unrealised value by FY30. 2Driven by the push from platforms like Samsung TV+ and JioTV+, which can be viewed on Connected TV sets, surge in smartphone ownerships, improved broadband infrastructure and huge demand for regional content that caters to the country's linguistic diversity in India, this tiered segment of M&E industry is set to see a massive growth.

Increasing prominence of interactive & immersive contents

OTT platforms in India are increasingly experimenting with interactive and immersive storytelling formats to engage viewers beyond passive consumption, to user-influences narratives and animations. The sector is driven mainly by Gen Z and Gen Alpha, who value participation and real time engagement over traditional linear formats. This emerging content includes AR/VR enabled and interactive narratives. The WAVES 2025 summit on "OTT Revolution: How AI, Personalization & Interactive Content Are Changing the Streaming Landscape" has helped bring to light the powerful transition in India's storytelling legacy under the influence of artificial intelligence and interactivity reshape.3 Integration of AI is helping construct a powerful recommendation engine to provide attention-grabbing and relevant content by ensuring a competent platform. From user persona, clicks and the total amount of time spent on watching a particular content, to deeply analysing the user's watch history, AI can help platform owners to understand consumer preferences and increase consumer engagement. This terrific approach can ensure a lower bounce rate, while holding the audience's attention for a longer duration, on shows that appeal to their sentiments or interests. India being a country of storytelling, people like and consume immersive, creative, and original content, and technological and customisable advancements in the same is a definite robust growth factor for the industry.

Increasing popularity of short form video content

In response to shrinking attention spans and the surge in mobile first consumption, micro dramas-short form narrative series, are gaining immense popularity. These bite sized story formats distributed across OTT platforms and social media, appeal to time constrained users, with particularly from the urban audiences. As a result, content creators and producers are adapting to short form video contents and are ramping up investments in local OTT startups. Along with startups such as Flick TV, Eloelo, Kuku FM, Chai Shots, and ReelSaga, other digital players including Amazon TV, ShareChat and Zee Entertainment, which are also tapping into the growing appetite for micro-dramas, driven by consumer interests.4

Enhanced Content personalization

With growing competition and a saturated market space, AI driven personalized content personalization is gaining massive interest among OTT platforms. Based on consumer viewing history, behaviour, language, and average time spent on category specific video contents, platforms can deliver tailored recommendations and curated playlists and watchlists. The aim is not just to increase the user engagement on the platform while increasing viewing duration, but also to ensure reduced churn rates and bounces, through these hyper-relevant content offerings. Furthermore, this personalization is expanding beyond voice searches to dynamic subtitle styling to suit individual preferences. These key drivers have significantly contributed to the revenue generation of the OTT businesses, making them grow at a remarkable CAGR of 14.9%, the highest among the top 15 countries, to reach Rs. 35,061 crore (US$ 4.25 billion) by FY28. 5

Growth in OTT sector in India

Mapping historical trend in growth

The OTT sector in India has witnessed explosive growth, fuelled by improved internet access, affordability, and shifting consumer preferences. Initially slow to gain traction, the industry surged forward with the 2015 launch of Hotstar, driven by its live sports streaming content. The real boom occurred post-2016, following Reliance Jio's introduction of affordable 4G data, which significantly expanded the internet user base and allowed platforms like Netflix and Amazon Prime to penetrate the market with local content. The COVID-19 pandemic further accelerated OTT adoption, with platforms becoming primary entertainment sources during lockdowns. By 2022, India boasted over 500 million OTT users, with increased investments and a rise in regional content production. Latest trends include hybrid content release strategies and technological innovations enhancing user experience. Overall, India's OTT sector continues to grow rapidly, supported by ongoing investments and evolving content strategies, setting the stage for continued expansion and innovation in the future.

The online video and OTT (Over-The-Top) content market in India has experienced consistent growth, influenced by the rise of OTT aggregation services and shifts in consumer behaviour. As of 2024, approximately 47 million households were subscribed to 111 million OTT subscriptions. This growth has been partly driven by the popularity of OTT aggregation services such as Amazon Prime Video Channels and Tata Play Binge, which have become particularly appealing to users facing subscription fatigue. These aggregation services offer a consolidated platform to access content from multiple sources, enhancing visibility for smaller OTT applications and simplifying content discovery for users.

In 2024, video subscription revenues reached INR 92 billion, marking a 11% increase. Moreover, audio subscriptions revenue reached to INR 7 billion, and news subscriptions gained traction, primarily driven by the availability of premium and exclusive content.

Ad-supported OTT models have faced challenges due to the inflated costs associated with premium content and unsold ad inventory. In response, many platforms are transitioning to subscription-based models or bundling their services with data and e-commerce offerings to provide better value to consumers and enhance revenue streams. This strategic shift aims to address the financial pressures and competition within the OTT space.

Digital advertising grew at rate of 17% increasing from INR 581 billion in 2023 to INR 700 billion by 2024. However, the ad revenues for news and music are expected to face difficulties unless platforms can cultivate loyal, app-based audiences. This underscores the need for OTT platforms to innovate and find effective ways to attract and retain viewers.

Content trends in the OTT space are evolving, with a notable increase in vernacular content production, which is projected to account for 55% of total output. Regional OTT platforms are set to continue their growth, fuelled by strategies such as dubbing and subtitling. Moreover, there is a growing focus on content efficiency, with metrics like subscription sales, ad revenue, and viewer engagement being prioritized over traditional vanity metrics like reach.

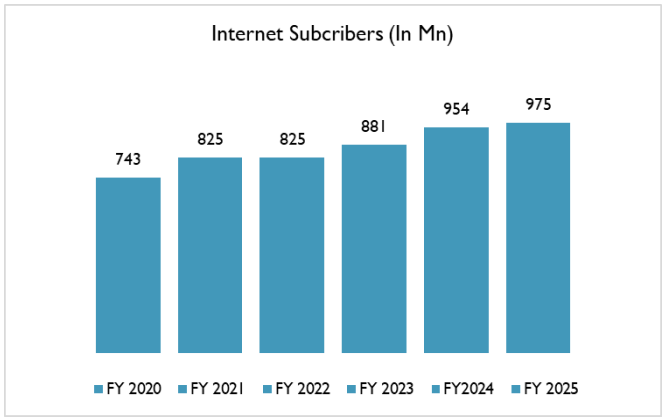
Looking ahead, video OTT subscriptions are expected to rise to 138 million across 65 million households by 2026. The content landscape is expected to shift towards high-impact tentpole properties to attract new subscribers, alongside lower-cost productions aimed at maintaining ongoing engagement. Additionally, older OTT content may be repurposed for television to appeal to trial viewers from AVOD platforms and traditional TV audiences.

Overall, the OTT sector is adapting to changing market dynamics with increasing digital subscriptions, strategic bundling, and a heightened focus on regional content production and monetization strategies.

Key Factors Driving Online Streaming in India

Growth in internet subscriber base

The Indian internet market has been expanding rapidly, with the number of internet subscribers reaching 979.71 million by June 2025, up from 954 million in March 2024. This growth is driven by the increasing demand for online services, digital transformation, and expanding internet infrastructure. The market remains predominantly wireless, with 935.02 million wireless subscribers, while wired internet subscribers stood at 44.69 million. The rise in broadband subscriptions, which grew by 2.17 % to 979.71 million, indicates a clear preference for high-speed internet. Conversely, narrowband usage has continued to shrink, falling to 24.98 million at the end of May 2025, reflecting the diminishing role of lower-speed internet as consumers increasingly adopt broadband solutions.



A huge portion of the growth comes from urban regions, where 669.69 million users are based, while rural areas account for 537.39 million subscribers, indicating a growing penetration in less developed regions as well. The overall internet subscriber rate in India now stands at 69.10 per 100 population. This surge in digital connectivity across both urban and rural areas underscores India's ambitious digital transformation initiatives, with increasing access to online education, e-commerce, and social media. The consistent rise in internet penetration is fostering an inclusive digital ecosystem, fuelling economic and social developments

Impact of robust growth in telecom subscriber base

The Indian telecom sector, the second largest in the world by subscriber count, has experienced remarkable growth over the past few years. This expansion is driven by factors such as affordable tariffs, increased service availability, and the rollout of recent technologies like 3G, 4G, and now 5G. The widespread adoption of 5G is expected to significantly boost internet consumption by enabling faster speeds, lower latency, and the seamless integration of advanced applications across industries. Changing consumer consumption patterns, with a demand for faster and more reliable connectivity, have further fuelled this growth. The government has played a crucial role in creating a conducive regulatory environment, promoting competition, and supporting infrastructure development, which has contributed to the overall sectoral growth. By December 2024, the total number of subscribers had reached 1,199.33 million, increasing to 1,203.84 million by April 2025, reflecting steady growth at 0.41%. Rural telecom growth has also been significant, with subscribers rising to 536.65 million, pushing rural tele-density to 59.26%, while urban areas account for 667.19 million subscribers. Wireless services dominate the market, making up 1,166.43 million connections until the end of April 2025.

Private operators continue to hold the majority, controlling 97.94% of the market, while public sector operators account for only 3.06%, reflecting a highly competitive market structure. Tele-density in the country has reached 85.19%, demonstrating the widespread accessibility of telecom services across India. With the ongoing transition to 5G networks and increasing smartphone penetration, the demand for high-speed data continues to rise. Telecom companies are making substantial investments in infrastructure, including fiber optics and 5G technology, to meet this demand, laying the foundation for further expansion. The sector's growth is not just a boost for consumers, but also for industries relying on digital connectivity, solidifying India's telecom market as a critical player in the global digital landscape.

Smartphone penetration

India's smartphone market is set to experience significant growth, potentially tripling to USD 90 billion by 2032. Key factors include India's strong economic growth, increasing per capita income, urbanization, and infrastructure improvements. Despite India's current low smartphone penetration (around 40%), the market is expected to grow 11% annually, driven by consumer demand for higher-end devices, especially models over USD 250. By 2032, India could account for 15% of the global smartphone market by value and 20% of worldwide shipments, becoming a crucial driver in the global market.

India is projected to reach 1 billion smartphone users by 2026, driven largely by rural areas, according to a Deloitte report. In 2021, India had 1.2 billion mobile subscribers, with 750 million using smartphones. The rural sector is expected to grow at a 6% compound annual growth rate (CAGR), compared to 2.5% in urban areas. Higher internet adoption, the BharatNet program's push to fiberize villages by 2025, and increasing use of smartphones for fintech, e-health, and e-learning are key factors propelling this growth.

The demand for smartphones is expected to surge, with 5G contributing significantly to new smartphone sales. By 2026, 5G-enabled devices will account for 80% of sales, with an estimated 840 million 5G smartphones sold between 2022 and 2026. The smartphone market is projected to reach USD 250 billion by 2026. The government's incentive packages for semiconductor manufacturing are expected to boost local production, positioning India as a strong player in electronics manufacturing. Despite current supply chain challenges, the market is set to grow as the digital ecosystem evolves.

Key factors driving digital content consumption.

Affordable Internet and Smartphones: The availability of affordable smartphones and low-cost data plans has been instrumental in expanding access to digital content across India. As of 2023, India ranks 7th globally in terms of affordable mobile data prices, with an average cost of USD 0.16 per GB. The cheapest plan costs USD 0.02 per GB, while the most expensive plan is USD 43.75. This affordability reflects India's strong position in providing low-cost internet services, contributing significantly to the rapid growth of internet adoption across the country. The widespread availability of budget smartphones has also enabled users from diverse economic backgrounds to connect to the internet, further fuelling the growth of digital content consumption.

Growing Internet User Base: India's internet user base has seen remarkable growth, reaching over 1F[2]969.6 million users as of June 2024. This expansion is particularly evident in rural areas, driven by government initiatives such as the BharatNet program. Launched to fiberize all villages by 2025, this initiative aims to improve internet infrastructure and accessibility in underserved regions, which in turn boosts digital content consumption among rural populations.

Youth Demographics: India's large, young population plays a significant role in the digital content landscape. With a substantial number of tech-savvy millennials and Gen Z consumers, there is a strong inclination towards digital platforms and recent technologies. This demographic's familiarity with digital tools and platforms drives higher engagement with various forms of digital content, from social media to streaming services.

Shift Towards Regional Content: There is a notable shift towards consuming content in regional languages, reflecting India's diverse linguistic landscape. Approximately 95% of YouTube users in India watch videos in their regional languages, demonstrating a strong demand for localized content. This trend is driven by the desire for content that resonates culturally and linguistically, encouraging content creators to produce and distribute more regional material.

Increase in On-Demand Content Consumption: The rise of streaming services such as Netflix, Amazon Prime Video, and local platforms like Hotstar has transformed content consumption patterns. Users now prefer on-demand access to content rather than adhering to traditional broadcast schedules. This shift has led to a rise in binge-watching and increased engagement with streaming platforms, which offer a vast array of content choices at users' convenience.

Mobile-First Consumption: With mobile devices becoming the primary means of accessing digital content, there is a significant shift towards mobile-first strategies among content providers. The majority of internet traffic in India originates from mobile devices, underscoring the importance of optimizing content for mobile consumption. This trend drives the development of mobile-friendly platforms and applications to meet the needs of a mobile-centric user base.

Diverse Content Formats: The availability of various content formats, including short videos, web series, podcasts, and interactive content, caters to diverse consumer preferences and lifestyles. This variety encourages frequent engagement with digital platforms, as users can choose content that aligns with their interests and consumption habits. The ability to access diverse types of content keeps users engaged and attracts a broader audience.

Social Media Influence: Social media platforms like Instagram, Facebook, Snapchat etc. significantly influence digital content consumption by facilitating the easy sharing and discovery of newer content. Influencers and regional e-celebrities play a crucial role in driving engagement, as their endorsements and content recommendations reach large audiences. Social media's ability to amplify content and create viral trends contributes to increased digital content consumption.

Technological Advancements: Technological advancements, particularly the rollout of 5G networks, are expected to further boost digital content consumption. 5G technology promises enhanced streaming quality and faster internet speeds, which will improve the overall user experience. As consumers seek higher-quality content and more reliable connectivity, the adoption of 5G is likely to drive increased engagement with digital platforms.

Key challenges & risks associated with release on OTT platforms in India

As OTT platforms in India continue to grow exponentially, the shift from traditional cinema to digital streaming has presented several opportunities. However, releasing films and series on OTT platforms also involves significant challenges and risks. These can impact the profitability, visibility, and long-term success of content on digital platforms.

Content Saturation and Competition

- **Oversupply of Content:** The rapid expansion of OTT platforms has led to a massive influx of content. With over 40 OTT platforms in India, including major players like Netflix, Amazon Prime Video, JioStar, Zee5, and regional platforms, there is a high level of competition. This oversupply makes it difficult for individual content pieces to stand out and attract viewers. Smaller films or niche content may get buried under more popular or widely marketed releases, reducing their visibility and impact.

- **Attention Span and Retention:** Viewers on OTT platforms have short attention spans due to the wide range of choices available at their fingertips. Retaining an audience's interest throughout the content and ensuring a positive reception in the first few hours of release is crucial. Poor audience engagement or negative reviews can drastically reduce the success of content on OTT platforms.

Revenue Model and Monetization

- **Subscription vs. Ad-Supported Models**: OTT platforms operate on various monetization models, such as Subscription Video on Demand (SVOD) and Ad-Supported Video on Demand (AVOD). Each has its challenges. SVOD platforms like Netflix rely on subscriptions, meaning content must appeal to a broad audience or niche groups willing to pay, while AVOD platforms rely on ads, which can lower content consumption for users who dislike ad interruptions. Films and series on AVOD platforms face the risk of not generating significant revenue if ad sales or user engagement fall short.
- **Lack of Transparent Revenue Sharing:** Revenue-sharing models between content creators, producers, and OTT platforms often lack transparency. Smaller production houses may find it challenging to negotiate favourable terms with big platforms, leading to reduced earnings or unfair splits of the profits. This is especially true when content fails to meet platform expectations in terms of viewership.

Discoverability and Marketing

- **Algorithm-Driven Discoverability**: OTT platforms heavily rely on recommendation algorithms that determine which content is shown to users. This algorithm-driven system can be challenging for new releases to penetrate, especially if initial viewership metrics do not trigger the algorithm's recommendation mechanisms. As a result, content can get buried, limiting its reach. Films and series may fail to attract viewers if they don't appear prominently in search results or recommendation feeds, further amplifying the discoverability challenge (EMP).
- **Cost of Marketing**: Releasing content on OTT platforms still requires extensive marketing to build anticipation and draw in viewers. In a crowded space, promoting a film or series through digital advertising, social media campaigns, and influencer partnerships is necessary but costly. Small to mid-sized production companies may struggle to allocate sufficient funds for marketing, impacting the visibility and success of their content.

Piracy and Intellectual Property Theft

- **Content Piracy**: Despite the technological advancements in digital security, OTT platforms remain vulnerable to piracy. Films and series are often pirated shortly after their release on platforms and shared across illegal websites, leading to revenue losses. Piracy is especially rampant in India, and combating this offer has been a persistent challenge for content creators and platforms alike. Leaked or pirated content diminishes the exclusive value of digital releases, as potential paying subscribers may opt for illegal versions, resulting in reduced profits.
- **Intellectual Property Protection**: Ensuring intellectual property (IP) protection is crucial in a digital-first environment. Content creators need robust legal frameworks to protect their original content from being copied or distributed without consent. However, enforcing IP rights can be costly and time-consuming, especially when dealing with content distribution across various countries.

Viewer Fragmentation and Regional Preferences

- **Diverse Audience Segments:** India is a country with diverse cultures, languages, and preferences, making it difficult to create content that appeals universally across different regions. OTT platforms must navigate this fragmentation, often requiring multiple language versions, localized content, and targeted marketing strategies. Content that works in one region might not resonate with audiences in other regions, impacting its success. Platforms need to balance the creation of pan-India content while catering to specific regional tastes.

- **Regional OTT Platforms vs. Global Giants**: Regional OTT platforms such as Zee5 or Sun NXT are competing with global giants like Netflix and Amazon Prime, which have larger budgets and international reach. This competition poses a risk for smaller platforms in terms of content acquisition, user engagement, and marketing spend. Regional players may struggle to secure the same level of investment as their international counterparts, making it harder for them to thrive in the highly competitive OTT market.

Technology and Infrastructure

- **Internet Penetration and Streaming Quality**: While internet penetration is increasing in India, not all regions have access to high-speed internet. For viewers in rural or underdeveloped areas, low bandwidth and poor internet quality can hamper their ability to stream high-definition content seamlessly. This impacts viewership numbers, particularly in smaller towns and regions. OTT platforms face the challenge of providing high-quality streaming experiences across various regions, especially where internet infrastructure is weak. Buffering, low resolution, or frequent interruptions can lead to viewer dissatisfaction.
- **Device Fragmentation**: A significant portion of India's OTT consumption occurs on mobile phones, but users also access content on smart TVs, tablets, and laptops. Ensuring a consistent, high-quality user experience across multiple devices is crucial. However, this can be challenging due to varying screen sizes, internet speeds, and device capabilities.

Regulatory and Content Censorship

- **Content Regulation:** India's OTT platforms face regulatory scrutiny, particularly around sensitive subjects such as religion, politics, and morality. The government has introduced regulatory guidelines for digital content, and OTT platforms must now adhere to a content code that includes self-censorship and oversight mechanisms. Content creators face the risk of sudden changes in regulations or increased censorship, which can delay releases or force edits that could impact the narrative or intended message of the content.
- **Legal Risks**: The possibility of legal challenges or public outcry against controversial content is high. With increasing sensitivity around certain topics, films or series released on OTT platforms can face backlash, including demands for bans or boycotts. Such events can harm the platform's reputation and financial standing.

Competitive Landscape

The Indian production house landscape is marked by the presence of established giants and emerging players, collectively driving the growth of the country's entertainment industry. Dominant entities like Yash Raj Films, Dharma Productions, and Reliance Entertainment maintain their competitive edge through expansive portfolios, significant budgets, and advanced production capabilities. These players continue to dominate the box office with large-scale cinematic productions and have expanded into digital platforms to cater to evolving viewer preferences. Production houses like Balaji Telefilms and Sunshine Productions are also making notable strides by focusing on innovative storytelling and creating content for both theatrical releases and streaming platforms.

The rise of digital streaming services has reshaped the competitive dynamics, with production houses increasingly collaborating with OTT platforms like Netflix, Amazon Prime, Zee5 and JioStar. MARKET OPPORTUNITY

The Indian Media & Entertainment ("M&E") industry presents significant growth opportunities, driven by structural shifts in consumer behavior, technological advancements, and increasing demand for diverse, high-quality content. As a biggest content production house with two and half decades of experience and a diversified portfolio across television, films, OTT and digital, we believe our company is well-positioned to benefit from these opportunities. *Note: Unless otherwise stated, the information in this section has been extracted from the Dun & Bradstreet ("D&B Report") Report commissioned by us for this Offer Document.*

Expansion of Digital and OTT Ecosystem

India is among the fastest-growing OTT markets globally, with over 500 million monthly active video users. Subscriptions are expected to rise with the continued expansion of digital infrastructure. The OTT segment is projected to grow at a CAGR of approximately 14.9% between FY 2024 and FY 2029, supported by affordable mobile data, rising smartphone penetration of over 750 million users, and increased willingness to pay for premium content.

This growth has resulted in demand for original, premium and regional content across genres including thrillers, dramas, comedy and documentaries. Our Company is engaged in developing films and web originals for both domestic and international OTT audiences in response to this demand.

Sustained Demand for Television Content

Television continues to remain the largest contributor to the Indian media and entertainment industry, accounting for nearly 40% of total industry revenues in FY 2024. India had over 230 million television households in FY 2024, with penetration of approximately 98% across urban and rural areas. Viewership has remained steady, particularly in Tier 2 and Tier 3 cities, where television continues to be the primary form of entertainment.

Our Company has produced long-running television franchises such as Comedy Circus, Crime Patrol, Laughter Chefs and Baalveer. Our Company continues to develop a pipeline of non-fiction weekend formats and weekday fiction series in addition to reboots and renewals of existing properties. Programming across advertiser-preferred genres such as reality, game, comedy and crime formats has historically supported broadcaster demand and contributed to Our Company's ongoing relationships in the television segment.

Growing Branded Content and Advertising Integration

Digital advertising in India increased from ₹581 billion in FY 2023 to ₹700 billion in FY 2024, a year-on-year growth of approximately 17%, making it the fastest-growing advertising medium. Brands are increasingly shifting towards content-led storytelling and influencer-driven campaigns as substitutes for traditional commercials. This trend creates opportunities for content producers to integrate brand messages within entertainment formats.

Our Company is developing original programming for digital platforms, including YouTube and short-format drama, and seeks to participate in branded content and advertising integrations. With digital advertising projected to account for nearly 50% of India's total ad spend by FY 2029, branded content is expected to remain an important area of opportunity for Our Company.

Increasing Regional and Vernacular Content Consumption

Regional content is a significant driver of growth in the Indian entertainment sector. Approximately 95% of YouTube users in India consume videos in regional languages, and in 2023, regional OTT content consumption surpassed Hindi content consumption for the first time. Broadcasters and OTT platforms are investing in Tamil, Telugu, Bengali and Marathi originals, reflecting audience demand in Tier 2 and Tier 3 markets.

Our Company is in the process of expanding its regional content capabilities and is developing a dedicated film slate in Tamil, Telugu and Malayalam in collaboration with local writers, directors and regional OTT platforms. These initiatives are intended to enhance Our Company's presence in regional markets and increase reach among audiences outside the Hindi-speaking belt.

Rising Demand for Feature Films and Direct-to-Digital Releases

The post-pandemic period has seen audiences increasingly adopt direct-to-digital releases in addition to theatrical

launches. Mid-budget and content-driven films have gained traction on OTT platforms as streaming services expand their investments in exclusive rights and original productions.

Our Company has recently commenced operations in film production and is engaged in developing a slate of films and web originals for release across both theatrical and direct to digital platforms. These initiatives are undertaken through collaborations with industry professionals and creative talent.

Export of Indian Content Globally

Indian content has seen increasing acceptance in overseas markets, both among diaspora audiences and local populations in Asia, Africa, the Middle East and certain Western markets. This trend has been supported by global OTT platforms distributing Indian originals internationally and by the outsourcing of VFX and post-production services to India, which has expanded the global visibility of Indian creative services.

Our Company's produced tv content is already popular for international licensing and syndication and now Our Company is exploring format adaptations and co-productions for global audiences and will also get into licensing and syndication deals for its original and digital first Ips in international markets These initiatives are intended to create additional revenue streams and support Our Company's presence in overseas markets.

Integrated & scalable production model with risk management

Our Company undertakes control over the content creation through a vertically integrated process across *ideation → creative development → production → post-production → delivery*, **concurrent multi-project** execution across TV, Films, OTT and Digital platforms. This approach aids in achieving cost and production efficiencies quality control. The business model addresses the inherent risks of the entertainment sector by balancing owned intellectual property projects along with commissioning and line-production work. One example is the partnership with T-Series, where T-Series provides production funding and monetization efforts, while Our Company retains a 50% share of intellectual property rights and profits. This framework offers upfront revenue certainty and allows for potential long-term benefits. Talent agreements that incorporate profit-sharing elements further align incentives and help manage upfront costs. This model supports operational stability, return optimization, and measured growth.

Early digital expansion & strategic tech/platform partnerships

As part of Our Company broader transformation into a future-ready media company, Our Company is placing significant strategic emphasis on digital-first content creation, with a focus on IP ownership, platform-driven monetization, and tech-enabled scalability.

- **Google Veo-3 Strategic Partnership**: Among a select few globally to secure preferred early access to Google's generative video platform, Veo-3. Our teams have been trained by Google and are actively testing the platform, giving us a first-mover advantage in India for AI-powered animation, short-form, and live-action styled content.
- **YouTube-First Animation IP**: Launching a new slate of fully owned animated IPs via proprietary YouTube channels. These will be monetised across ad revenues, OTT windowing (licensed exclusivity followed by YouTube release), and brand integrations—ensuring recurring, scalable revenues.
- **Micro-Drama Platform:** Targeting the massive rise in short-form vertical storytelling, developing serialized, vertical short-form dramas targeting Gen Z audiences, delivered via a dedicated consumer-facing app/platform powered by A content creation and scalable pipelines. Monetisation will come from freemium models, commerce integration, brand partnerships, and syndication.

Relationships across the entertainment ecosystem

Our company maintains a long-standing relationship with all major network and broadcasters in India, namely, Sony, Colors, Zee, Star, SAB, as well as leading digital OTT platforms including Netflix, Amazon Prime Video, Amazon MXPlayer, Sony Liv, JioStar, Zee5, T -Series (Super Cassettes Industries Private Limited and others

In-house creative & production capabilities

Our Company has in-house teams managing creative development, scripting, production and post-production. This vertical integration provides oversight over content quality, ensures alignment with creative objectives and enables cost efficiencies. It also allows our Company to manage multiple projects simultaneously without reliance on external vendors. Our Company applies data-based processes in evaluating new projects, including audience insights for greenlighting decisions. It has the capability to localise and adapt formats, as well as to create original intellectual property for cross-platform use. Examples include India's first live interactive show Rising Star and the play-along format *Sabse Smart Kaun*?. Our Company also adapts international formats for Indian audiences and develops original content for wider markets. These capabilities form the basis of its production consistency and delivery standards, supported by operational playbooks that allow scale across television, film and digital without compromising quality.

Technology-Enabled Production Standards

Our Company applies modern post-production and visual effects pipelines and has integrated generative AI tools such as Veo-3 in its content creation workflows. It has a track record of delivering projects on time and within budget and has implemented governance and process frameworks consistent with listed-company standards of quality, compliance and repeatability.

OUR STRATEGIES

Our Company expects that India's economic growth will support higher spending on entertainment across theatres, television and digital platforms. Increasing penetration of screens across the country, particularly in Hindi-speaking markets in northern India, is anticipated to expand screen availability per release, generate higher box office revenues and create greater demand for content tailored to Tier 2 and Tier 3 audiences.

According to the D&B Report, over 1,790 films were released in India in 2023 across regional, Hindi and OTT platforms, reflecting the scale and diversity of the industry. Affordable mobile data and widespread internet penetration have accelerated the growth of digital media and supported the expansion of the OTT ecosystem. Streaming services such as Netflix, Amazon Prime Video and Jio Cinema have provided additional distribution channels for films and series, increasing accessibility for audiences. With the continued increase in internet penetration and subscriber growth, demand for video and music content on OTT platforms is expected to rise. Higher box office collections are also expected to contribute to increased revenues from satellite and digital rights.

Our Company also considers overseas markets to represent an important area of growth. In addition to demand from the Indian diaspora, local audiences in Asia, Africa, the Middle East and Western markets are increasingly consuming Hindi films and web series through exposure on OTT platforms. This trend has created opportunities for Indian content producers to expand their presence internationally.

Our Company's strategies to scale its operations and earnings growth are set out below:

Scale Production Capacity Across Vertical

Our Company plans to expand its film and web series slate with a calibrated mix of low-, mid- and high-budget titles. Multiple projects are in development and pre-production stages. The strategy includes:

- Expanding the pipeline of stories through larger writer rooms, commissioning concepts, and acquiring rights to books, scripts, remakes and sequels.
- Recruiting and training new creative talent including assistant directors, writers and producers to support multiple production units.
- Enabling concurrent execution of projects across formats to extend the revenue pipeline and improve medium-term visibility.
- Entering regional markets through dedicated slates in Tamil, Telugu and Malayalam, with local writer rooms, directors and cast, as well as co-productions with regional partners.
- Localizing digital content by dubbing and subtitling owned intellectual properties into multiple Indian languages, supported by workflow automation and AI-assisted tools.

This strategy is intended to accelerate time-to-market, support steady delivery, and enable our Company to manage multiple production pipelines simultaneously.

Diversify the Portfolio

Our Company intends to broaden its slate across multiple genres and formats, including theatrical films, direct-to-digital releases, series and animation films. This diversified portfolio is expected to expand audience reach, mitigate concentration risk and enhance revenue predictability, supported by a mix of productions across different budget levels.

Shift from Commissioned Work to Intellectual Property Ownership

Historically, our Company's television business has operated under a cost-plus commissioning model, with intellectual property retained by broadcasters. Going forward, while continuing to grow its television business, our Company intends to increase its focus on developing and owning intellectual properties. In its film business, this approach has already been adopted, enabling our Company to participate across the full monetisation cycle and build a recurring asset base.

Launch New Business Verticals – Digital Transformation and Technology Integration

Our Company is pursuing digital-first initiatives with a focus on intellectual property ownership, technology adoption and platform-driven monetisation. Key initiatives include:

a) **Google Veo-3 Partnership**: Our Company is among a limited number of global content creators with early access to Google's generative video platform, Veo-3. Company teams have been trained by Google and are testing the platform for AI-enabled animation, short-form and live-action styled content.
b) **YouTube-First Animation IP**: Our Company is developing original animated intellectual properties to be launched through proprietary YouTube channels. Monetisation is expected through advertising, licensing to OTT platforms and brand integrations
c) **Micro-Drama Platform**: Our Company is developing serialized short-form dramas targeted at Gen Z audiences, to be distributed through a dedicated application. Monetisation models under development include freemium access, commerce integration, brand partnerships and syndication.
d) **Automation in digital content creation:** Our Company has developed a full stack Content Management System (CMS) and AI Content creation platform to streamline the entire content lifecycle, encompassing planning, creation, management, and distribution. This design will help us to enhance efficiency, reduce costs, and support scalable growth across business verticals**.**

COLLABORATIONS / JOINT VENTURES

Strategic Relationship with T-Series: Partner & Investor

Our Company has established a long-term partnership with a leading Indian music and entertainment company, which functions both as a strategic investor and as a production partner. Our Company's film business commenced with a seven-film slate arrangement with T-Series under a pre-sale studio model, which subsequently evolved into a strategic investment by T-Series. Under this structure, T-Series funds production and manages monetisation, while the Company retains 50% ownership of intellectual property and a corresponding share of profits on a continuing basis.

The relationship, while non-exclusive, has positioned the Company as a preferred partner for certain projects. It provides opportunities in line production, co-productions and joint pitching of content slates to OTT platforms for direct-to-digital films.

Key aspects of the collaboration include:

- Support for the Company's film slate since 2022;
- Line production outsourcing to the Company on a cost-plus margin basis, contributing to recurring revenues;
- Access to T-Series' subscriber base of over 300 million on YouTube for joint marketing and distribution of the Company's digital properties; and
- Joint participation in OTT co-pitching and direct-to-digital opportunities.

The partnership provides the Company with established distribution channels, additional production opportunities and recurring revenue arrangements, while enabling participation in film and digital projects alongside a large-scale industry participant.

MARKETING STRATEGY

The Indian Media & Entertainment ("M&E") sector is undergoing a structural shift in marketing practices, with traditional broadcast promotions increasingly supplemented or replaced by digital-first, partnership-driven and regional-language-focused strategies. Our Company has aligned its marketing framework to reflect these industry changes to support reach, monetization and audience engagement across multiple platforms

Strategic Partnerships for Distribution & Promotion

Partnerships have become an important element of content marketing in India, allowing production houses to expand reach beyond organic viewership. Our Company has established a strategic alliance with T-Series, which operates the world's largest YouTube channel with over 300 million subscribers, giving us access to digital audiences for marketing and distribution of our original IPs. This collaboration allows for joint promotion of content across multiple formats, ensuring higher visibility at launch and long-tail discoverability.

In addition, industry trends backed by established industry reports highlight OTT co-pitching with platforms and direct-to-digital releases as important levers for marketing-led growth. Our Company, intends to co-develop projects with OTT players, thereby benefiting not only from their marketing infrastructure but also from early visibility to their subscriber base. This dual approach of leveraging partnerships across both music/digital networks and OTT ecosystems ensures that our properties are marketed with scale and efficiency.

Transition to IP Ownership & Monetization

The industry report underscores that moving from commissioned work to owning intellectual properties (IPs) is a critical strategic shift for content producers. When IPs are owned, production houses retain long-term control over branding, marketing, and repeat exploitation opportunities. This includes re-runs, syndication, dubbing, international licensing, and format adaptations, all of which extend the lifecycle and visibility of a property.

Our Company is actively transitioning from a predominantly commission (cost-plus) model to an **IP-led portfolio** across businesses. This approach is intended to create **recurring and annuity-like revenues** through renewals, multi-window exploitation and derivative rights, while we continue our commissioned TV pipeline for stability.

- **Television (Commissioned; IP with Broadcaster):**

  While broadcasters retain IP rights, Our Company is the **original creator/producer** on several long-running properties. In practice, this provides a **recurring pipeline** through repeat seasons, reboots, specials and format refreshes, where broadcasters typically return to us to produce subsequent cycles. Examples include

shows/franchises like Laughter Chefs, Crime Patrol, Comedy Circus, Rising Star, Baalveer and other Comedy and Crime variants.

- **Films (Co-owned IP):**

  Under our slate model we **co-own IP and share profits with partners**. Primary monetization includes theatrical and direct-to-digital sales; the **second cycle** comprises subscription and advertisement-based video-on-demand (SVOD/AVOD) and satellite licensing, catalogue/library sales, music and soundtrack, remake/adaptation rights, international territories and other derivative rights. This structure is designed to provide upfront realizations as well as recurring cash flows from library exploitation, while limiting downside under studio models. Going forward, we will produce animation features for both theatrical and direct-to-digital release under a **100% IP-ownership** model—**without relying on studio financing or distribution**—so we retain full rights and control across production, marketing, and exploitation. **Digital (Owned IP):**
  We intend to **create and fully own** digital IPs such as animation, micro-dramas and short-form series. Monetisation avenues include advertising revenue shares (e.g., YouTube), brand integrations, sponsorships, clip and license sales, dubbing/localization, and licensing to OTT/AVOD platforms. For selected intellectual properties, ancillary lines such as merchandising, gaming and live/event extensions may be explored. Our Company's early access to Google's Veo-3 generative video platform is expected to lower unit costs and shorten production cycles, supporting catalogue build-up and recurring revenues at scale.

Across all verticals, this approach is intended to (i) **increase revenue visibility** through repeat exploitation cycles and library usage, (ii) **improve margin profile** through IP participation, and (iii) **diversify risk** while preserving the stability of the commissioned TV base.

Digital-First Transformation

Digital-first strategies are reshaping marketing in India. The industry highlights include YouTube-first IP launches, AI-enabled content creation (e.g., Google Veo-3 partnerships), and vertical storytelling formats are increasingly used in the industry to reach the younger audiences better. These innovations are designed to connect with younger, mobile-first audiences who engage primarily through short, personalized, and immersive content.

Our Company is executing a **digital-native go-to-market** intends to launch owned intellectual properties (including animation and micro-dramas) on its YouTube channels, supported by early access to Google's Veo-3 platform for AI-assisted content creation, enabling rapid, cost-efficient creation optimized for vertical/mobile formats. Campaigns are guided by **AI-driven audience insights**- including informing creative, thumbnails, trailers, and media- with rigorous **A/B testing** against watch-time, retention, and conversion KPIs. Reach is further **amplified via platform partnerships and the T-Series network**, while our owned channels capture **recurring monetization** through ads, brand integrations, and licensing. This translates the industry shift into faster release cycles, lower CAC, and compounding IP value.

Emerging Formats & Consumer Engagement

The future of marketing lies in interactive and immersive storytelling. According to the report, AR/VR, AI-driven personalization, and short-form vertical dramas are emerging as tools to capture Gen Z and millennial audiences. These formats allow audiences to not just consume but interact with content, creating a deeper emotional connection.

We are building an in-house **content operations stack**, a proprietary **CMS** integrated with an **AI-generation/automation layer** (including our early access to Veo-3), to systematize *ideation → scripting → storyboard → asset creation → edit → QC → publish.* This platform will manage metadata/rights, automate thumbnail/trailer variants, and enable **programmatic scheduling** across YouTube/Shorts/Reels, thereby lowering unit costs and **compressing time-to-market** for digital content at scale. On marketing, we will deploy **AI-assisted audience segmentation**, keyword/topic intelligence, and **multi-variant creative testing** to optimize CTR, retention and watch-time, supported by performance buys, creator collaborations, and amplification through partner networks. For our **micro-drama consumer platform**, we plan a **personalized feed**, episodic drops, interactive features (polls, alt-endings), and **lifecycle marketing** (onboarding, re-engagement, win-back), complemented by referrals, loyalty tiers and gamified rewards to build habit and LTV. Monetisation will include ad-share, sponsorships/brand integrations, premium unlocks and downstream licensing. Taken together, this stack is intended to drive **faster release cycles, higher engagement, and recurring digital revenues**.

Cross-Platform Launch Strategies

Content in India is distributed and consumed across television, OTT platforms, and social media. Industry practices

indicate that properties released with a coordinated presence across these mediums obtain broader reach and higher audience recall compared to single-platform launches. Recent examples in the sector demonstrate that simultaneous releases across broadcast and OTT platforms, supported by social media distribution, improve visibility and audience engagement.

We plan to apply a standardized model of YouTube-first plus OTT simulcast for its owned intellectual properties. For example, animation series such as the *Baalveer* animation universe, as well as non-animation series, will premiere on Our Company's YouTube channels with near-simultaneous releases on OTT platforms. Regional dubbing and subtitling will be incorporated to expand reach. For larger animation titles, theatrical releases may precede digital (SVOD/AVOD) and social distribution. Our Company intends to support launches through social platforms such as Instagram, Facebook, Reels and Shorts, and creator collaborations using teaser drops, clip packs, behind-the-scenes content and performance marketing. Our in-house CMS and AI-enabled tools are expected to assist in scheduling, creative testing and audience retargeting.

This approach, which has been implemented in our Company's film and television launches, will be extended to all Optimystix-owned intellectual properties. Our Company's in-house CMS and AI-based tools are intended to support programmatic scheduling, creative and version testing, and audience retargeting, thereby contributing to subscriber growth, franchise development and recurring revenues across platforms.

Data-Driven and Analytics-Led Campaigning

The growth of digital platforms has expanded access to real-time audience data and viewership analytics. Industry reports note that the use of analytics and AI-enabled tools allows content producers to allocate marketing resources more efficiently and evaluate campaign outcomes with greater accuracy. This reflects a shift from intuition-led campaigning to measurable, data-driven promotion strategies.

At present, our Company's marketing decisions primarily rely on television TRPs and selective insights from film campaigns. Going forward, Our Company intends to establish a unified, data-led marketing and content system for its digital businesses, covering both its owned YouTube channels and the planned micro-drama platform. The system will integrate YouTube Analytics (via API), OTT platform analytics and social listening tools into a proprietary content management system, generating real-time dashboards on impressions, click-through rates, retention curves, average watch time, completion rates and cohort performance by geography, language and device.
The system is expected to initiate automated A/B testing of titles, thumbnails, cut-downs and posting windows; recommend edits, localisation and dynamic scheduling; and feed insights back into creative and post-production workflows to accelerate iteration and reduce unit costs. Media budgets will be allocated using predictive ROI benchmarks with continuous optimisation across YouTube, Meta and OTT platforms, including audience retargeting and lift testing. This analytics framework is expected to improve greenlighting timelines, content success rates and resource efficiency, while maintaining privacy-compliant governance of first-party data.

BUSINESS PROCESS FLOW:

TV & Web Series – Operating Model and Process:
Commercial model: Both verticals operate on a cost-plus margin basis with milestone-linked cashflows. Budgets are locked per episode/season.

A. Development & Greenlight (common to TV and OTT)

Origination: The process begins either with (i) platform brief, where our team develops the concept, series bible, pilot outline; or (ii) internal IP origination and pitch.

Writers' room & materials: Includes creation of logline, synopsis, series bible/season arc, character sheets; for OTT, episode outlines and 1–2 sample scripts are developed for pitching to the broadcaster / OTT platform.

Creative iterations: Collaborative notes → rewrites → table reads; sensitivity/legal reviews as needed.

Packaging: Preliminary casting grid, director/HOD shortlists, look & feel, schedule, top-sheet budget is discussed with the broadcaster / OTT platform.

Greenlight gate: once the broadcaster / OTT platform is happy with the final script/show flow, casting options etc the platform/channel issues "approval in principle" (or pilot order). For OTT: formal greenlight email with budget acceptance; for TV: slot/episode count and launch window.

B. Budgeting, Contracting & Risk

Budget lock & cashflow: Our commercial and production teams build a detailed bottoms-up budget from the approved concept/episode scripts, including schedule, rate cards and contingency, with a milestone-wise cashflow. This is presented to the channel/OTT commercial team; after negotiations, the per-episode/season budget, payment schedule are formally locked.
Contracting / Commissioning: Following budget approval, the parties' legal teams finalize the commissioning/production agreement (SOW, deliverables/tech specs, acceptance criteria, IP/credits/exclusivity, data/security, and payment terms). Execution occurs prior to principal photography (or under a platform LOA where applicable).

C. Pre-Production

Pre-prod plan: Final scripts, breakdowns, story-board & schedule, locations, art/sets, costume, VFX plan, tech specs per broadcaster/OTT are shared for their approval.

Approvals & Coordination: Weekly show-runner/platform 15check-ins; locked deliverables calendar.

Readiness to shoot: Casting confirmations, rehearsal/table reads, risk assessment & safety brief, call sheets

D. Production execution:

Unit production management, daily cost reports, dailies review with show-runner/platform; adherence to schedule.

E. Post-Production & Delivery

Editing and Finishing: It includes Offline/online: Edit → sound design → music → grade → VFX → tracks.
Compliance & QA: Broadcast standards/OTT guidelines, legal/sensitivity re-checks, accessibility packs (subs/CC; dubs for multilingual).
Final Deliverables: Delivery of Master per tech spec, artwork/metadata, promos/trailers; acceptance sign-off and invoice per milestone.

Film:

Our film development begins with story origination and rights—acquiring book/remake/life rights or evaluating pitches brought by writers and directors. We commission the screenplay, attach the director, and conduct actor narrations. Based on feedback, we iterate and lock the script with the director and lead cast aligned on creative, schedule, and deliverables. With the creative package in place, we onboard a studio for financing, distribution, and release. We present the script, director, and cast; negotiate a bottoms-up budget, payment schedule, and windowing plan; and secure a formal greenlight. Only after budget and timelines are executed—and actor dates are confirmed—do we commence production.

Digital: Own IP:

For own-IP digital, we operate as a self-financed, self-distributed studio: we identify stories/scripts/concepts, develop and lock the script, attach a director, cast talent, and produce; releases follow a pre-set YouTube publishing schedule with coordinated marketing. For animation IP, we mirror this flow create original characters/worlds, complete writing and show bibles, then use our internal toolchain to produce at scale and publish per schedule. As the IP owner, we greenlight internally on the strength of the script/story and package, and we handle production, marketing, and monetization (AVOD/shorts share, sponsorships, music, and international dubs) end-to-end.

Transition to IP Ownership & Monetization

Our Company owns 50+ IPs across for Film, OTT and Digital.

MARKETING EXPENDITURE

Our Company principally operates in the commissioned content model, both for television and OTT platforms. Under this model, the Broadcaster or OTT platform commissions the content and provides a fixed production budget within which the Company is required to deliver the show or content.
All marketing, promotional, and audience engagement activities for such commissioned content are undertaken and fully funded by the respective Broadcaster or Platform, as they are the owners of the exploitation and monetization rights.
Similarly, in the case of feature films, the commercial arrangement is such that the Studio finances the production budget and acquires the rights to exploit and distribute the film. The Studio also incurs all promotion and distribution-related expenditure. These expenses are recouped by the Studio from the revenues generated post-release. After deduction of production costs, P&A expenses, legal costs, interest, and other applicable charges, the net balance, if any, is shared between the Studio and the Company as per the agreed revenue-sharing arrangement.

Tentative Time Lines for Movies and OTT Series are as under:
1. Development phase - 3-4 Months
2. Pre-Production phase – 3 to 4 Months
3. Principal Shooting - 3 to 6 Months
4. Post Production phase - 3 to 6 Months

Release / Live: As per the studio and the OTT platform in agreement with the company.

The Company operates in a highly competitive market with established domestic production houses, new entrants and international content providers. Rapidly evolving audience preferences and shorter consumption cycles increase competitive pressures.

Technological Change

Developments in artificial intelligence, new content creation tools and changing consumption patterns may affect industry dynamics. Failure to adapt to these developments may affect competitiveness.

Regulatory Environment

The Company is subject to evolving regulations relating to media, OTT platforms and AI-driven content.

Consumer Fragmentation

Shifting consumer preferences and shorter attention spans require continuous innovation and adaptation of content strategies.

COMPETITION

The Indian production house landscape is marked by the presence of established giants and emerging players, collectively driving the growth of the country's entertainment industry. Dominant entities like Yash Raj Films, Dharma Productions, and Maddock Films Pvt Ltd maintain their competitive edge through expansive portfolios, significant budgets, and advanced production capabilities. These players continue to dominate the box office with large-scale cinematic productions and have expanded into digital platforms to cater to evolving viewer preferences. Production houses like Balaji Telefilms and Sunshine Productions are also making notable strides by focusing on innovative storytelling and creating content for both theatrical releases and streaming platforms. (Source: D&B Report)

The rise of digital streaming services has reshaped the competitive dynamics, with production houses increasingly collaborating with OTT platforms like Netflix, Amazon Prime, Zee5 and JioStar. This shift has driven a surge in demand

for original and diverse content, prompting traditional players to expand their offerings and adapt to changing consumption patterns. Simultaneously, the success of regional films and stories with global appeal has encouraged production houses to explore multilingual projects, ensuring wider audience reach. Partnerships with international studios for co-productions and global distribution have further amplified the influence of Indian production houses in the global market. (Source: D&B Report)

Despite the growth opportunities, the sector faces several challenges, including heightened competition, regulatory changes, and content saturation. With audience expectations at an all-time high, production houses must consistently innovate to remain relevant. Furthermore, technological advancements like AR/VR and VFX integration are becoming crucial for maintaining competitive parity, while piracy and IP protection issues continue to pose risks. As the industry evolves, the ability to balance creative innovation with operational efficiency will define the success of production houses in India's dynamic entertainment ecosystem. INTELLECTUAL PROPERTY RIGHTS

Copyrights

Our business, like that of other companies involved in the production segments of the entertainment industry, rests on our ability to maintain rights in content through copyright protection.

Copyright in India is protected by the Copyright Act of 1957 as amended by the Copyright Amendment Act, 2012. Under section 13 of the Copyright Act 1957, copyright protection is conferred on literary works, dramatic works, musical works, artistic works, cinematograph films and sound recording. Copyright refers to a bundle of exclusive rights vested in the owner of copyright by virtue of Section 14 of the Copyright Act 1957. These rights can be exercised only by the owner of copyright or by any other person who is duly licensed in this regard by the owner of copyright. These rights include the right of adaptation, right of reproduction, right of publication, right to make translations, and communication to public. Copyright protection is conferred on all “original” literary, artistic, musical or dramatic, cinematograph and sound

recording works. "Original" means that the work has not been copied from any other source. Copyright protection commences the moment a work is created, and its registration is optional. Copyright registration does not confer any rights and is merely a prima facie proof of an entry in respect of the work in the Copyright Register maintained by the Registrar of Copyrights. The Copyright Amendment Act, 2012 provided that copyright extended to digital media including streaming. Under Indian law, the general rule is that copyright lasts for 60 years. In the case of original literary, dramatic, musical and artistic works the 60-year period is counted from the year following the death of the author or composer.

Indian copyright laws only provide copyright protection within the borders of India. Hence, to secure protection to Indian works in foreign countries, India has become a member of the following international conventions on copyright:

- Berne Convention for the Protection of Literary and Artistic works.
- Universal Copyright Convention.
- Convention for the Protection of Producers of Phonograms against Unauthorised Duplication of their Phonograms.
- Multilateral Convention for the Avoidance of Double Taxation of Copyright Royalties.
- Trade Related Aspects of Intellectual Property Rights ("**TRIPS**") Agreement.

We are largely dependent on legislation in each territory to protect our rights against unauthorized reproduction, distribution or public performance. In all territories, our intellectual property receives some degree of copyright protection, although the extent of effective protection varies widely. For in depth details about our trademarks and copyrights, please refer to the chapter, "***Government and Other Approvals,***" on page 251.

APPLICABLE LAWS AND REGULATIONS

BUSINESS /TRADE/ INDUSTRY RELATED LAWS/ REGULATIONS

1. The Cinematograph Act, 1952 ("Cinematograph Act")

The Cinematograph Act authorizes the Central Government to constitute a Board of Film Certification, (also known as the "Central Board of Film Certification" or "CBFC"), in accordance with the Cinematograph (Certification) Rules, 1983, ("Certification Rules"), for sanctioning films for public exhibition in India. Under the Certification Rules, the producer of a film is required to apply in the specified format for certification of such film, with the prescribed fee. The film is examined by an examining committee, which determines whether, the film:

- is suitable for unrestricted public exhibition;
- or is suitable for unrestricted public exhibition, with a caution that the question as to whether any child below the age of 12 years may be allowed to see the film should be considered by the parents or guardian of such child; or
- is suitable for public exhibition restricted to adults; or
- is suitable for public exhibition restricted to members of any profession or any class of persons having regard to the nature, content and theme of the film; or
- is suitable for certification in terms of the above if a specified portion or portions be excised or modified there from; or
- is not suitable for unrestricted or restricted public exhibitions, i.e., that the film be refused a certificate.

A film will not be certified for public exhibition if, in the opinion of the CBFC, the film or any part of it is against the interests of the sovereignty, integrity or security of India, friendly relations with foreign states, public order, decency or morality, or involves defamation or contempt of court or is likely to incite the commission of any offence.

Any applicant, if aggrieved by any order of the CBFC either refusing to grant a certificate or granting a certificate that restricts exhibition to certain persons only, may appeal to the Film Certification Appellate Tribunal constituted by the Central Government under the Cinematograph Act within thirty days from the date of such order.

2. The Cinematograph Amendment Bill 2023 (the "Bill")

The Bill seeks to address several long-standing issues in the Indian film certification process, piracy, and content regulation. While there is a need for modernization to align with evolving technology and societal norms, it is crucial to strike a balance between artistic freedom and the interests of the public.

The proposed amendments, if implemented effectively, have the potential to streamline the certification process, curb piracy, and enhance transparency and accountability. However, careful attention must be paid to the implementation to ensure that it does not unduly restrict artistic creativity, impinge upon fundamental rights, or pose privacy concerns.

As the Bill progresses through the legislative process, it is essential for stakeholders, filmmakers, and legal experts to engage in constructive dialogue to make informed decisions and shape a comprehensive framework that benefits all parties involved in the filmmaking industry.

3. Cine Workers and Cinema Theatre Workers (Regulation of Employment) Act, 1981

The Cine-Workers and Cinema Theatre Workers (Regulation of Employment) Act, 1981 was enacted on December 24, 1981 with an intention to regulate the employment conditions of certain cine workers and workers of the cinema theatre and other issues related with the subject. The labour laws that existed in India did not provide adequate safeguards to the low paid performers or artistes and other technicians who are employed in the making of feature films. The law also did not contain the terms of their employment, payment of salaries and remunerations and provisions regarding other amenities. Additionally, the workers of the cinema theatres are not facilitated with gratuity, provident fund and other employment benefits.
The Act defines cinema theatre as a place that has obtained license as per the provisions of the Cinematograph Act, 1981 or any law that is enforced in a State for the purpose of exhibiting cinematograph film. A 'cine worker' means and includes:

- A person employed either directly or under a contractor or any other person engaged in the creation of a feature film for the purpose of working as an artist or to do any works of expertise, unskilled, labor-intensive, administrative, scientific, artistic or any other work;
- A person whose salary for his work connected with the creation of feature film in a month does not go beyond one thousand six hundred rupees where the payment is made by monthly wages, and the feature film shall not exceed fifteen thousand rupees where such payment is made by way of lump sum.

A person shall work as a cine worker for the creation of a feature film only where an agreement is entered between the employee and the producer of the feature film or between the producer and the contractor or other person. The agreement entered according to the Act shall be registered by the producer of the feature film with the competent authority. The agreement shall be in the specified format and include such particulars as provided under the Act. It shall contain the nature of duties of the worker, working hours, employment benefits if any, manner of payment of remuneration, payment to the provident fund and other stipulations of employment. Where the employee works under a contractor or any agent, the agreement shall contain a specification regarding the obligations to be fulfilled by the contractor to the employee and the remedy for non-compliance with such obligations. The specification shall include the liability of the producer to discharge certain responsibilities, payment of remuneration etc.

4. Indecent Representation of Women (Prohibition) Act, 1986 (the "IRWP Act")

The IRWP Act prohibits the depiction of women in an indecent or derogatory manner in films and other forms of media, aiming to promote gender equality and respect for women in Indian society. The IRWP Act defines "indecent representation of women" as the depiction in any manner of the figure of a woman, her form or body or any part thereof in such a way as to have the effect of being indecent, or derogatory to, or denigrating, women, or is likely to deprave, corrupt or injure the public morality or morals and prohibits publication, sale, let to hire, distribution, circulation or sent by post, any book, pamphlet, paper, slide, film, writing, drawing, painting, photograph, representation or figure which contains indecent representation of women in any form. The prohibition shall not apply to:

(i) Any book, pamphlet, paper, slide, film, writing, drawing, painting, photograph, representation or figure the publication of which is proved to be justified as being for the public good on the ground that such book, pamphlet, paper, slide, film, writing, drawing, painting, photograph, representation or figure is in the interest of science, literature, art, or learning or other objects of general concern; or which is kept or used bona fide for religious purposes;
(ii) any representation sculptured, engraved, painted or otherwise represented on or in any ancient monument within the meaning of the Ancient Monument and Archaeological Sites and Remains Act, 1958 (24 of 1958); or any temple, or on any car used for the conveyance of idols, or kept or used for any religious purpose; and
(iii) any film in respect of which the provisions of Part II of the Cinematograph Act, 1952, will be applicable.

CORPORATE AND COMMERCIAL LAWS

The Companies Act, 2013

The provisions of the Act state the eligibility, procedure and execution for various functions of the company, the relation and action of the management and that of the shareholders. The law lays down transparency, corporate governance and protection of shareholders & creditors. The Companies Act plays the balancing role between these two competing factors, namely, management autonomy and investor protection.

Competition Act, 2002

The Competition Act, 2002 came into effect on June 1, 2011 and has been enacted to "prohibit anti-competitive agreements, abuse of dominant positions by enterprises" and regulate "combinations" in India. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circular proposes to introduce and implement the UPI payment mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019 until March 31, 2019, or floating of five main board public issues, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a Individual Investor had the option to submit the Application Form with any of the Designated Intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public Offer closure to listing continued to be six working days.

Phase II: This phase has become applicable from July 1, 2019 and was to initially continued for a period of three months or floating of five main board public issues, whichever is later. Subsequently, it was decided to extend the timeline for

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and Foreign Exchange Management Act, 1999 ("FEMA"). While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. Under the Industrial Policy, unless specifically restricted, foreign investment is freely permitted in all sectors of Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The government bodies responsible for granting foreign investment approvals are the Reserve Bank of India ("RBI") and Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India ("DIPP").

The Government of India has from time to time made policy pronouncements on FDI through press notes and press releases. The Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, GoI, earlier known as Department of Industrial Policy and Promotion **("DPIIT")** issued the Consolidated Foreign Direct Investment Policy notified by the DPIIT File No. 5(2) / 2020-FDI Policy dated October 15, 2020, with effect from October 15, 2020 (the "FDI Policy"), which consolidates and supersedes all previous press notes, press releases and clarifications on FDI issued by the DPIIT or the DPIIT that were in force and effect prior to October 15, 2020. The Government of India proposes to update the consolidated circular on FDI Policy once every year and therefore, the FDI Policy will be valid until the DPIIT issues an updated circular.

The RBI also issues Master Circular on Foreign Investment in India every year. Presently, FDI in India is being governed by Master Circular on Foreign Investment dated July 01, 2015, as updated from time to time by RBI and Master Direction– Foreign Investment in India (updated up to March 08, 2019). The Indian company making such fresh Issue of shares would be subject to the reporting requirements, inter-alia with respect to consideration for offer of shares and also subject to making certain filings including filing of Form FC-GPR.

In case of investment in sectors through Government Route, approval from competent authority as mentioned in Section 4 of the FDI Policy 2020 has to be obtained. The transfer of shares between an Indian resident to a non-resident does not require the prior approval of the RBI, subject to fulfilment of certain conditions as specified by DIPP / RBI, from time to time.

The transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that

(i) the activities of the investee company are under the automatic route under the foreign direct investment policy and transfer does not attract the provisions of the Takeover Regulations;

(ii) the non-resident shareholding is within the sectoral limits under the FDI policy; and

(iii) the pricing is in accordance with the guidelines prescribed by the SEBI / RBI.

Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020 issued by the DPIIT and the Foreign

Exchange Management (Non-debt Instruments) Amendment Rules, 2020 which came into effect from April 22, 2020, any investment, subscription, purchase or sale of equity instruments by entities of a country which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country ("Restricted Investors"), will require prior approval of the Government, as prescribed in the Consolidated FDI Policy and the FEMA Rules. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction / purview, such subsequent change in the beneficial ownership will also require approval of the Government. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made a similar amendment to the FEMA Rules. Pursuant to the Foreign Exchange Management (Non-debt Instruments) (Fourth Amendment) Rules, 2020, a multilateral bank or fund, of which India is a member, shall not be treated as an entity of a particular country nor shall any country be treated as the beneficial owner of the investments of such bank of fund in India.
